

PATH OF ECONOMY Leads Straight to Mayhew's Door

OUR POLICY

Right is right. There is only one truth—only one square way—only one fair margin of profit—one way to serve the public. We stand for the right—for truth—for the square way of serving the community. Our buying power, ever increasing, is used to bring you a better quality of merchandise, the best value possible each season, relative to conditions. We take but a small, fair margin of profit for our service. Our salespeople like their treatment here, believe in the institution and the goods they sell—and no one here is ashamed to look a former customer in the face. We stand back of every article we sell, and when accidents happen—they are liable to "in the best of regulated families"—WE ALWAYS DO OUR PART.

WARSHIP FIGHTING TOPS.

They Are Now Mainly Used For Sentry and Signaling Work.

Lord Nelson was killed by a musket ball fired from the cross-trees of his French antagonist. Because of this fighting tops came into existence and, being developed to keep pace with other parts of naval construction, continue to be a traditional feature of the world's navies.

A century ago, when fighting men—marines, boarding parties, gun crews—crowded the upper decks of a warship, a sharpshooter posted aloft picked off many a man. But a big battleship in action today shows not a mark to the man in the fighting top.

In the days when it still remained possible for boatloads of armed men to swarm up the sides and board a fighting ship plunging shots were dropped from the fighting top. But with great steel walls overhanging the waves and never an accommodation ladder swung out for their welcome it is impossible for uninvited guests to set foot on the modern deck.

The captain of the fighting top is usually in control of flag, semaphore and heliograph signaling, leaving the wireless to an invisible operator interned somewhere in the ship's vitals. He is the sentry against small inquisitive craft and may enforce his orders by the rattle of a light quick-firer.

He has the outlook, reports and questions passing ships and has virtues as a detective against spies. His functions, however, are limited. He is not high enough placed to see the submarine creeping along a score of feet beneath the surface or to note its wake of broken water.

The fighting top is in big cruisers quite a massive affair and no longer the tiny binnacle behind which the picked riflemen of the ancient knelt. A duplicate set of range finders is usually kept there and used to check off the work of the experts in the fire control tower. There are light quick-firers and machine guns, possibly also a high angle gun or two for use against air craft.

The Western Fair.

The dates for the Western Fair, London, Ont., are September 7th to 15th this year. Several thousand prize lists, maps, hangers and other advertising material will be mailed from the general offices, Dominion Savings building, in a few days. If space is required in any of the buildings for an exhibit it should be applied for at once in order that suitable arrangements may be made. The programme of attractions, Harry O'Malley of Denver, Cal., is visiting his father, Col. O'Malley, here.
