

No negotiations have been made to date with the Indian Commissioner for B.C. other than to obtain the latest available plans for the Indian Reserve. It is hoped that answers to the above queries will be available as soon as possible, since the time for construction is limited by the short low-water period in July and August, and therefore, if the letting of the contract is delayed by slowness in obtaining site clearances, the entire project will have to be postponed for one year, (until the next low-water period).

C. H. Clay,
Division Engineer.
