

September. Noted on Duck Mountain, Big Plain, and along Red River. Nest found June 21, 1883. (See Auk, April, 1884, pp. 192, 193.)

241. **Mourning Warbler.** *Oporornis philadelphia*. Common summer resident of dry scrub lands throughout the Alleghanian region, arriving in late May, "departing early in September" (Criddle).
242. **Northern Yellowthroat.** *Geothlypis trichas*. Common summer resident of thickets in the Alleghanian region, arriving about May 20, departing in September.
343. **Wilson Warbler.** *Wilsonia pusilla*. Summer resident throughout the Province; not common. Arriving in mid-May, departing in mid-September.
244. **Canadian Warbler.** *Wilsonia canadensis*. Apparently found throughout the Province as a rare summer resident. According to N. Criddle it arrives about May 20 and departs the last of August.
245. **American Redstart.** *Setophaga ruticilla*. Common summer resident of all woodlands. Arrives in mid-May; departs in mid-September.
246. **American Pipit.** *Anthus rubecens*. Abundant spring and fall migrant throughout the Province.
247. **Sprague Pipit., Missouri Skylark** *Anthus spraguei*. Formerly resident summer of Assiniboine region wherever there were high dry prairies, arriving May 1, departing September 1. This bird was very abundant on the Big Plain in 1882, but in 1892 I failed to see or hear a single individual in the country. It appears to have totally disappeared. This is unquestionably owing to the breaking up of the virgin prairie.
248. **Catbird.** *Dumetella carolinensis*. Abundant sum-
