NEW WAVERLEY OATS

HOW MANY GRAINS IN THE WAVERLEY OAT HEAD?

FAMOUS WAVERLEY WHITE OATS

FROM EUROPE. GIVES ASTONISHING RETURNS GROWN IN CANADA.

WE believe more new varieties of Oats have been placed before the public than any other kind of seed grain. Many heavy croppers have been introduced of late, but on first trial they are rejected on account of thick, coarse hulls or poor weak straw, if for nothing else. When, therefore, we state that in addition to the Waverley yielding immense crops, it is also thin in the hull and has a clear bright amber colored straw, which stands upright in almost all kinds of weather, we are sure we have said enough to enlist the attention of farmers everywhere. Our crops have satisfied us that it is wonderfully adapted to both the soil and climate of this country. Waverley is ready to harvest about the same time as other sorts, and is the heaviest weight oat we have ever seen. It is an early ripening, medium sized grain, the most distinctive feature of the NEW WAVERLEY is its producing three grains in a spikelet, whereas most all other varieties produce but two. Of immense feeding qualities, WAVERLEY gives great promise of becoming the leading oat for Canada, and we predict an enormous sale as soon as its merits become known.
