They are on the V ORMS only, producing no other consti-tutional effect than that which would follow a dose of SENNA, CASTOR OIL or SALTS. In the treatmen of WORMS the principal indi-ation is the FXPULSION of the Worms from the Bowels. This may be fulfilled in some instances by active Purgativee, which expel by increasing the peristaltic action of the bowels, or by Anthelmintics, which favor their expulsion through the brdinary contraction of the bowels by destroying them, or rendering them less able or less disposed to resist this contraction. Other preparations in use possess the latter property only, and to a feeble extent, for to produce it, it is necessary to give large and nauseous doses, and on the following day some purgative to carry off the effects of the previous day's medicine, Bowels.
