THE RUTH-ESTHER.

of the same name. The principal working on the group is a tunnel 300 feet in length, and this is to be extended another fifty feet at once. The vein is fourteen feet in width, carrying galena and grey copper with excellent values in gold, silver and copper. The company only requires a wagon road to commence shipping ore, and the has every evidence of being a steady and continuous producer of good ore.

PRESENT ROUTE GOOD.

PRESENT ROUTE GOOD.

As a practical man having the interests of the district at heart, Mr. Finnell has gone carefully over the route surveyed and located by Henry B. Smith, C. E. He believes the Smith route would open up the district to best advantage and with the best sprade procurable, which cannot be said of the routes previously surveyed.

IN EMBRYO

IN EMBRYO

The foregoing only touches a few of the mining propositions on Record and Sophie mountains that would be placed on an entirely new basis by the construction of the wagon road. The Miner hopes at an early date to refer to other properties of equal promise that would be opened up by the Sophie mountain road. It will be demonstrated beyond the shadow of doubt that the interests of the Rossland camp are suffering severely through the lack of action in respect to this road, and it is believed that when the truth is borne in upon the community

Is shipping about one hundred tons a day from material which was formed to be not worth the treatment, and has been used as filling. This has been discovered to be exceptionally rich in gold. So that even though the copper values so that even though the copper values at the smelter. On the new find, known as the Tregear vein, work is going along steadily. A shaft is being sunk which is in excellent ore, giving average values of 15 per cent copper. Many the lack of action in respect to this road, and it is believed that when the truth is borne in upon the community

Let us Pay

For a 50c. Bottle of Liquozone, to Show You What it is.

Just Oxygen.

Liquozone is simply liquid oxygen—no drugs, no alcohol in it. It is the discovery of Pauli, the great German chemist, who spent 20 years on it. His object was to get such an excess of oxygen in staple form into the blood that no germ could live in any membrane or tissue.

Oxygen is life to an animal—the very source of vitality. We would die in three minutes without it. In this liquid form its effects are exhilarating, purifying, vitalizing. But germs are vegetables, and this excess of oxygen is deadly to vegetable matter.

We Offer \$1,000

on every bottle of Liquozone for a germ that it cannot kill. And there is no other way to kill germs in the body without

Nelson.

If you suffer from a germ trouble, let us buy a bottle of Liquozone and give it to you to try. It is liquid oxygen—the best thing in the world for you. And in germ diseases it does what all medical skill cannot do without it.

We had faith enough in it to pay floo, ooo for the simple right to make it. We know its results so well that we will gladly pay for your test. Won't you, if you need it—in simple fairness to yourself—have faith enough to send us this coupon?

killing the tissues, too. Any germ-killing doug is a poison to you, and it cannot be taken internally. Medicine never destroys inside germs.

We spend 14 days in making each bottle free. And we supply it to physicians and hospitals everywhere at almost cost. In this fair way we are trying to intro duce this product to everyone who needs it. If you will be as fair with yourself, we will gladly show you how any germ disease can be cured.

Germ Diseases.

These are the known germ diseases All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease,
