revenue by a tariff of 17½ per cent. on imports. The Conservatives have increased this to 30, 40, 50, and in some cases even to In those days the Conservation, but they are taxes just the same.

There is taken out of the people of Canada over \$20,000,000 every year in customs taxes. If every cent collected through the operations of the protective policy went operations of the protective policy went into the treasury it could be borne, but for every \$1 that goes into the public coflers \$2 or \$3 go into the pockets of the protected manufacturer. I," said Mr. Laurier, "object to this. (Cheers.) I say that not a cent should be collected beyond what is required to meet the country's necessities. We will tax for revenue but not one cent for protection. Taxation is an evil that nothing but the requirements of the Government can in power-and I don't want to sell the skin of the bear until the bear is shot, yet I think the Tory bear is about to be skinned—we will relieve the people of protection, which is a fraud, a telusion and a robbery-for it is robbery to take money from one man and give it to It is not right that farmers should be taxed to give workingmen emshould be taxed to give workinghes em-ployment in the cities. It is not just to tax workingmen in order to appreciate the prices of farm products. The Liberals believe in justice to all; and no taxation

beyond what is due to the country. The issue is most clear. It is: Effective tariff reform in the interests of the whole people or a continuance of the blighting policy that has nurtured monopolies, has reduced the value of the farms of Canada despite the hard work of the agriculturists, has injured and retarded legitimate manufaturing industry in this city and in almost every city, town and village of the country, atrating the control of the great industries of the country in the hands of a

Some have said that the substitute for the high tax policy—the tariff for revenue only, as near British lines as possible-does not appeal to the selfinterest of the peop! a. On the contrary, it appeals to the enlightened self-interest of every self-respecting citizen of Canada, who desires to make the most of his energies, and to call upon no member of the community to pay tribute that he may increase his gains.

There is but one large manufacturing industry in the town of Waterloo, at which Mr. Laurier spoke on Saturday, and the proprietor of that factory sat on the plat. form, and cheered the sentiment that the best policy for Canada is one that collects as few taxes from the people as possible, and permits farmer as well as manufacturer to do the best he can in his line of business without any more interference than is necessary to get sufficient revenue to run the country economically. The fact is that in this city, and indeed throughout Canada, there is a substructial and growing rington. A large and in proportion of the manufacturing population has the matter in hand,

working hand in hand with the agriculturist to get rid of all class laws and all ounnecessary trammels on trade and commerce.

Dangerous Experiment-Claims He
Can Suspend Asimation.

New York, July 6.—A dispatch from
Toledo, Onio, says: Seymour, the mind
reader, was in Toledo yesterday on his way
to Chicago, where he is going to be buried
alive after the manner of the Indian
magicians, who say they can suspend
animation for any period by swallowing
their tongues and controlling the heart(and
mind. "My ceffin has gone ahead," said
Seymour. It is a fac-simile of the one in
which General Grant's remains now rest
and cost \$30,000. It is made in three sections one fitting inside the other. I will
be buried six feet deep in the ceffin. Signals will be arranged so if things do
not go right. I can communicate with
soldiers on the outside who will guard
the grave. Directly I am buried,
a crop of barley will be sown over
the grave. I will remain buried till
the grains sprout, grow, ripen and are
charvested. Then the disinterment will
take place. I won't go back to earth until
Sept. 24. I am positive I can do it and
the scientific men who are assisting me are
beginning to think so too."
