STRIKING MINERS' FAMILIES EVICTED FROM THEIR HOMES

Many of Them Are Without Any Shelter.

SOLDIERS SIDE WITH STRIKERS

Boston Story Says Miners' Union Was Hoodwinked by Railroads—Other Strikes.

Parkersburg, W. Va., Sept. 1.—An unexpected situation has resulted from the ordering out of the National Guard to preserve order in the coal fields. The soldiers, whose sympathies were all with the strikers, have used their influence with the men who are at work, and have persuaded so many of them to join in the strike that the detachment stationed at Rush Run had to be recalled and sent to another point to keep it from emptying the mine.

SHELTERLESS.

Hundreds of families are sleeping under the skies for cover, and with only the shelter of the skies for protection. It is estimated that over 1,000 families have been evicted in the New River Valley, and most of them had no place to go. Some had friends and secured shelter, but the majority are homeless, without even so much as a tent to shelter them, and there is talk of a subscription to buy tents for them. Food is scarce with the men, and the condition of the men is pitiable in the extreme. Some of the soldiers have even shared their food, provided by the state, with the families of the men who are in the strike.

ASSISTANCE.

New York, Sept. 1.—At the weekly meeting of the Central Federated Union, ten additional members were placed on the committee appointed to collect funds for the striking coal miners. They were instructed to make arrangements for an open air mass meeting for the purpose of urging President Roosevelt to call a special session of Congress to end the strike.

CHURCH ATTACKED.

Tamaqua, Penn., Sept. 1.—Only one disturbance was reported in the Panther Creek valley yesterday. While John and Albert Kutzek, non-union men, were leaving the St. Michael's Hungarian Church at Lansford, they were attacked by a number of foreigners and were compelled to return to the church for safety. After remaining for some time they succeeded in making their escape.

This evening the officials of the Switchback Railroad notified Major Gearhart that strikers were interfering with their passengers at Summit Hill. Company E of the Twelfth Regiment was sent to the scene, and succeeded in restoring order. Tomorrow morning a large force of soldiers will patrol the valley and protect non-union men while on their way to work.

PLANNED BY RAILWAY MEN.

Boston, Mass., Sept. 2.—According to the Advertiser's version of the report of Caroll D. Wright to President Roosevelt, the railroad interests, which make up the real coal trust, have to answer for planning this strike in advance and getting the unions to adopt the tactics mapped out for them.

The fact can be stated positively that from the time that the plan to clean up the coal supply of the country and to "get the trade on a proper basis" was first broached, until today, there never was a time when the railroad companies could not have had a settlement. That was just what they did not want. They were really bent on cornering the market by getting all the outside stocks of coal sold out before the fall trade began.

President Roosevelt has been holding off in the assurance that the strike would be settled between Labor Day and Sept. 15, and he does not believe in any mov which will stp setle in any move which will stop a settlement. As he has looked at the matter, the facts discovered by Mr. Wright will be just as strong and just as useful to the Government in a few weeks from today as they are today.

The President is taking his time, because he wants to be sure that when he does deliver his blow it will do the most damage.

COURT OF ARBITRATION.

London, Sept. 1.—The thirty-fifth trades union congress commenced a week's session in London today. Upwards of 500 delegates, representing a million and a quarter of workers, were present. They included many women delegates. The United States was represented by Harry Blackmore and Patrick Dolan.

One of the principal resolutions which was submitted demands legislation creating a supreme court of arbitration with compulsory power to settle disputes between employers and employes.

The report of the parliamentary committee refers to the visit of the British trades unnion delegates to Washington, and says they were greatly impressed with the advantage American trades unionists possess over the British, by the willingness of the president at all times to consult with accredited union representatives. The trusts, says the report, up to now, have made no bad use of their combination, wages having a tendency to increase.

STRIKE IN ITALY.

Florence, Italy, Sept. 1. — The employes of forty different callings have joined the strike which began last Friday. The town appears to be in a state of siege. Troops have been recalled from the maneuvers and from camp, and every square in the city is occupied by a company of soldiers. Strong infantry and cavalry patrols are parading the streets of Florence and its suburbs. All meetings and processions have been forbidden, and hundreds of suspected persons have been arrested.

STRIKE AT GENEVA.

Geneva, Switzerland, Sept. 1. — All the employes of the tramway lines of this city went on a strike yesterday because the manager of the electric work shops, who is an American, dismissed 42 men employed in the shops and offered them positions as conductors.

Strike Near End, Says Platt.

[N. Y. Sun.]

Senator Thomas C. Platt said yesterday at the Oriental Hotel, Coney Island, that the end of the coal strike is at hand.

"The coal strike will be settled within a week, or within two weeks at the outside," said the senator. "It will be settled in such a way that it will not be a political issue of any kind this fall."

Senator Platt added that he was not at liberty to say anything more about the matter, or about the manner in which the strike would be settled, but the events of the next few days would bear out his statement.

C. D. GRAHAM AT NIAGARA

Successfully Swam Rapids Below the Whirlpool.

His Barrel Lost—Broke Up on Reaching the Lower River.

Niagara Falls, N. Y., Sept. 1.—Carlisle D. Graham, of Philadelphia, successfully swam through the rapids below the whirlpool yesterday afternoon. He wore a life-preserver around his waist and a life-buoy on his neck. Graham covered the four miles from the whirlpool to Lewiston in 25 minutes.

LOST HIS BARREL.

Same years ago Carlisle D. Graham built a boat to go over Niagara Falls. He sent the craft through the upper rapids, but it went to pieces. Saturday afternoon he sent his famous barrel over the route so successfully traveled by Annie Edison Taylor. It swept through the rapids above the Horseshoe all right, and when it reached the brink it dropped over into the gorge in fine shape, but since then it has not been seen. It broke up on reaching the lower river and the current carried the pieces into the whirlpool.

107 in the Shade in Texas.

Austin, Texas, Sept. 1.—The hot weather of the past few days throughout this section has been unprecedented. Saturday the mercury climbed to 107 in the shade. Grass is being burned up and the cotton and forage crops are suffering severely.

Everybody Cannot Be Rich

—But everybody can and MILLIONS already have saved money, clothes, strength and temper by the use of

Hudson's Dry Soap.

Does all that is claimed for it. No more. No less.

Have your grocer send you a trial packet with your next order.

A $25,000,000 MORTGAGE

Promoters of New York and C. P. R. Are After One.

Wabash Pays $10,000,000 to Get Into Pittsburg.

New York, Sept. 1.—President Joseph Ramsey, jun., says that $10,000,000 will about cover the expense of establishing the Wabash Railroad in Pittsburg. He expects that the Gould terminal properties in that city will be ready for operation by next spring. His company then will be able to handle 2,000 cars of freight daily in that region.

WANT BIG MORTGAGE.

Albany, Sept. 1.—After listening a few minutes to the application of the promoters of the New York and Canadian Pacific Railroad for permission to issue a mortgage for $25,000,000 to build a road from Suffern, Rockland county, to Ogdensburg, St. Lawrence county, the State railroad commission adjourned the hearing until Friday, Oct. 3. Verplanck, Colvin and John W. Van Valkenburg, of this city, and John M. Boyce, of Gloversville, appeared for the proposed road, and Geo. H. Walker, representing the New York Central, opposed the application. He said that the railroad had no existence, and could not show any maps of its route.

In 1866 the New York and Albany, the Albany and Schenectady and the New York and Northern railroads secured charters from the Legislature, and in 1890 these paper roads were consolidated under the name of the New York and Canadian Pacific. Messrs. Colvin and Van Valkenburg and George Ramsey, of Rockland county, being the prime movers.

Mr. Colvin said that if the permission to mortgage is given, several trust companies stand ready to take the mortgage. The road, he said, already had permission to issue a mortgage for $20,000,000, but the extra $5,000,000 was necessary owing to the high price of materials.

Mr. Boyce said a corporation had been formed in New Jersey which would build a railroad connecting the New York and Canadian Pacific at Suffern with Jersey City, thus giving the road a southern terminus practically in New York city. He refused to state the name of the corporation or who was behind it.

Statue to a One-Time Poor Boy.

Watertown, N. Y., Sept. 1.—A statue of Roswell Pettibone Flower, who from a poor boy, born in this county, became a merchant, banker, congressman, governor and king of Wall street, was unveiled here yesterday. The ceremonies were attended by many thousands from far and near, and were marked by the eulogistical utterances of former Governor David B. Hill, ex-Lieutenant-Governor W. Steven, U. S. Senator John C. Spooner, and State Senator E. R. Brown. The statue was unveiled by Frederic Halsey Tartor, grandson of Governor Flower. It cost $25,000, which was raised by popular subscription.

AUTOMOBILE SCORCHERS

Responsible for a Number of Accidents.

Scare Horse to Death—Cause Runaways and Do Other Damage.

New York, Aug. 31.—The death-dealing automobile figured in yesterday's news in a variety of ways. The Long Island Protective Society has been organized to call a halt on reckless operators, especially those who have made themselves a terror on the country roads. In Oyster Bay the society has mapped out 22 courses, which are policed by deputies with stop-watches. Men who are not manifestly reckless are warned. So effective has been this patrol that since Aug. 1 only three arrests for speed violation have been made, when before that time there were many violations every day, with as many arrests as could be made.

Joseph Barnford was arrested in Montclair for running his automobile faster than ten miles an hour. His arrest was brought about through a telephone message from a doctor, who informed the police that the machine was running 30 miles an hour. A bicycle policeman followed for two miles before the lawbreaker was overtaken.

Edward Morris, the driver of the automobile hansom cab which was turned from its course by a switch in the car tracks at Seventh avenue, between Forty-third and Forty-fourth streets, and plunged through the board fence into the subway excavation, died of his injuries in the Roosevelt hospital.

A horse owned by James Smith, a milkman of Jersey City, dropped dead upon seeing an automobile. The horse was perfectly sound in wind and limb, Smith declared, but "he had never seen an automobile before and was simply frightened out of his life."

Two runaways were caused by automobiles within a few minutes of each other in Fifth avenue. The drivers of the horses were thrown to the street and injured. A delivery automobile ran into a runabout driven by Chas. Wells at Church and Forty-eighth streets and Fifth avenue. Wells was thrown to the street and bruised about the body. His horse ran away, but was captured before it had gone far. Albert Moody, 251 East Fifty-fifth street and Fifth avenue, a few minutes later, when an automobile frightened the horse. The animal ran away, and in a block had dashed the runabout into several carriages wrecking it. Moody was thrown out at Forty-fifth street. His head was cut and he was removed to Flower Hospital. The automobile disappeared.

AT THE ROCKLIFF RANGES

Thirty-Fourth Annual Meeting of the D. R. A.

Opening Day Was Unfavorable—London Men Among the Winners.

Ottawa, Sept. 1.—The thirty-fourth annual meeting of the Dominion Rifle Association opened this morning at the Rockcliffe ranges. Crack shots from all over the Dominion are here to participate in the tournament, and the attendance is slightly over former years. On the opening day the weather was most unfavorable. The sky was overcast and somewhat threatening, while the light was none too good. A left rear wind was blowing.

The first match shot was the Barlow. This was followed by the Bankers' and the McDougall.

In the Barlow match, the winners included A. H. Irving, Twenty-Ninth Waterloo Regiment, H. Hayden, Thirtieth Wellington Rifles, and Norman J. Dinnen, of the First Hussars, London.

In the Bankers' match the high scoring was sensational. There were seven possibles and a long string with 34 points. Major Hayes, of the Seventh Regiment, and Capt. Head, of the Wellington Rifles, were among the winners.

Capt. A. Wilson, of the Thirty-Third Huron Regiment; Pte. E. C. O'Brien, Thirtieth Wellington Rifles; Capt. J. Crowe, and Sergt. Hayden, Thirtieth Wellington, and Ptes. N. and J. W. Smith, of the Twenty-First Windsor Regiment, were among the winners in the McDougall cup match.

When a woman gives up it is because she has gone to the utmost limit of strength and endurance. It is a marvel how women will stagger on under the daily household burdens when the whole body is racked with pain.

For the nervous, run-down condition which so many women experience, as a result of overstrain in household cares, there is no medicine can equal Dr. Pierce's Golden Medical Discovery. It strengthens the weak stomach by curing diseases of the organs of digestion and nutrition. It purifies the blood of poisons which cause rheumatism and other painful diseases. It nourishes the nerves, and builds up the body with sound, healthy flesh.

There is no alcohol in "Golden Medical Discovery" and it is entirely free from opium, cocaine and all other narcotics.

Accept no substitute for the "Discovery." There is nothing "just as good" for weakness, nervousness and debility.

"I want the whole world to know what Dr. Pierce's medicines have done for me," writes Mrs. Helen Hardgrove, of Bangs, Knox Co., O., "I had many of the ills of woman's life. My lungs and throat troubled me besides, and I had rheumatism. About a year ago I had to give up work I was so bad. I had heard so much about your medicine I thought I would try it. I took four bottles of your 'Golden Medical Discovery' and 'Pellets,' and by the time I had taken half of the first bottle I began to gain, and kept on getting better. And now I have no more of my old ailments and am entirely cured of rheumatism. I feel like a new woman."

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

HOW FARM-BUILDING PAYS

Latest Avocation of Farmers in Nebraska.

Man by Use of Dams Made His Land 18 Inches Deeper in a Year.

Syracuse, Neb., Sept. 2.—Farm-building is the latest avocation of the Nebraska farmer. After the harvesting of the crops thousands of farmers in Eastern Nebraska will spend weeks in the construction of dams that will catch for them new land. Most of these farmers have been driven to this by the heavy rains of this summer, which have carried away the black soil from their farms and left them with only clay subsoil.

Lewis C. Burnett, of Otoe county, in a published letter, insists that the impairment of the soil in this manner this year far exceeds the loss caused by the drought of last year.

"The surface soil that is washed off with each rain or flood," he says, "is to the earth what cream is to milk, and while the subsoil is rich and with plenty of manure and good cultivation can be made to produce good crops, eventually, the black earth, which it has taken ages to prepare for the use of man, can never be reproduced. The loss will not be felt in diminished crops this year, but the soil will never be as good as before, and the droughts of coming years will hurt the farmers worse than ever."

It is agreed by the experts that the only way to save the black soil for Nebraska is to build dams that will catch the sediment before it goes into the Missouri. This is comparatively inexpensive, but involves a great deal of labor. The farmers have been engaged in recent years in tiling and ditching their lands, and this system, while abolishing chills and fever, has robbed the land of its natural storage reservoirs and impoverished the soil.

By a creek which empties into the Missouri, Charles Clayton, of this county, has a 400-acre farm which he "built" by the use of dams. This year he has caught 18 inches of soil-wash on an 80-acre farm. His whole farm is made up of washings from his neighbors' holdings. He has built up his farm until it is beyond the reach of high water. One 200-acre field of corn this year will yield 80 bushels to the acre, while none of his neighbors will go over 50. In one part of his farm is an 8-foot fill.

LABOR DAY ELSEWHERE

Enthusiastic Demonstrations All Over the Country.

Record-Breaking Turnout at Hamilton—Doings at Other Points.

Hamilton, Ont., Sept. 2.—The labor demonstration held here yesterday excelled anything of this nature ever held here. At noon a procession fully three miles long, with representative labor orders, many of them containing floats, etc., paraded the principal streets, and afterwards a demonstration of huge proportions, attended by a list of games and sports, was carried out at the driving part at East Hamilton. Excursions carried large numbers of people from other cities and towns, which helped to swell the attendance and make the demonstration a success. Last evening a band concert was held in the drill hall, under the auspices of the trades and labor organizations, which was a success in every respect.

AT GUELPH.

Labor Day here was celebrated by a trade procession in the morning, in which seventeen unions took part, 800 people being in line. In the afternoon there ware games, etc., and tonight there was a band concert.

AT NEW HAMBURG, ONT.

The following games were played here: Baseball—Hamburg 1, Berlin Furniture Co. 7. Lacrosse—Plattsville 4, Drumbo 4. Lawn tennis—Hamburg 3, Wellsby 0. Cricket—Hamburg vs. Dundee, draw. New Dundee and Hamburg bands were present during the day.

NEW YORK.

Dispatches from principal cities and towns of the country report a general observance of Labor Day. Parades of workingmen were larger than usual and no violence or disturbance of any kind is reported from any point.

A parade with nearly 40,000 men in line was the feature of New York's celebration of Labor Day. Besides the parade there were the usual sporting events, and picnics were given by various political organizations.

AT PHILADELPHIA.

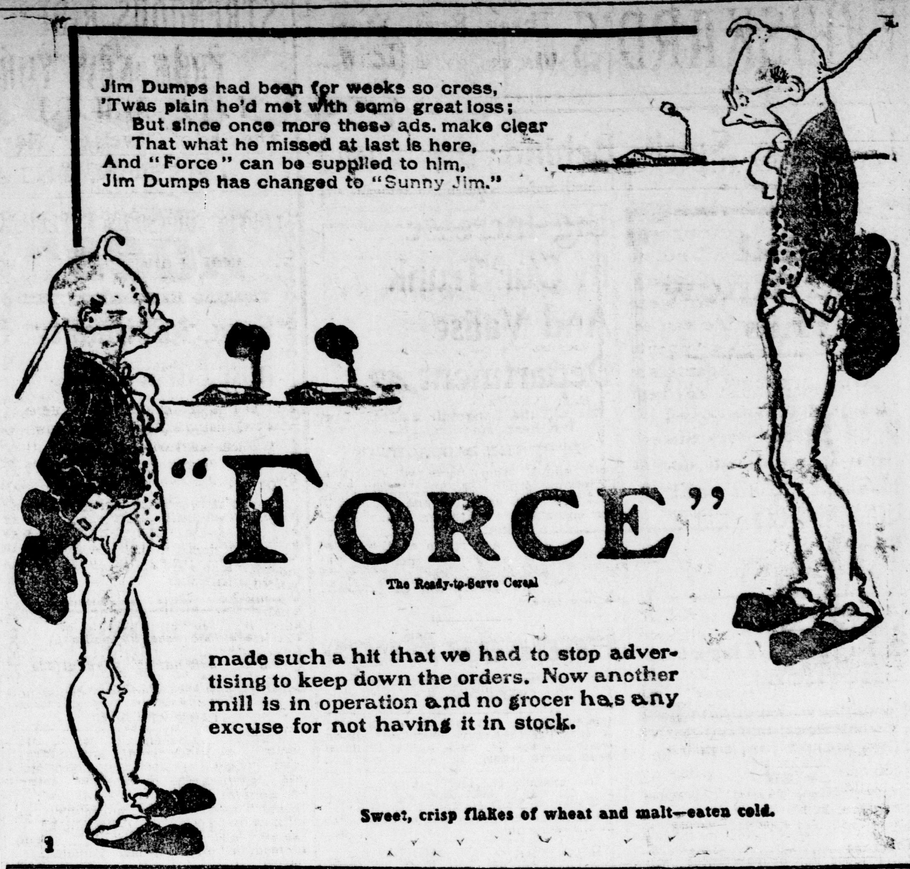
Labor Day was generally observed here by the various trades unions, and more than ordinary interest was displayed in the celebration from the fact that John Mitchell, President of the United Mine Workers of America, was the central figure of the demonstration. The weather was perfect, and it is estimated that 15,000 men participated in the street parade of labor organizations. The principal event of the day was a picnic at Washington Park, on the Delaware River, where two addresses were made by President Mitchell. All of the money collected during the festivities will be devoted to the cause of the striking miners.

AT CHICAGO.

More than half the usual business of Chicago was at a standstill in honor of labor. The plants of nearly every industry represented in over 300 local labor unions as well as all banks and the stock exchange and board of labor celebrated its annual holiday. During the morning hours a great throng of workingmen passed in review through the down town streets. A novel feature of this parade was a contribution of money for the striking anthracite miners thrown into a number of outstretched American flags borne along the route by several of the unions. In the afternoon, picnics were held at many of the adjacent parks where addresses on labor questions were made by prominent speakers.

AT ALBANY.

Labor Day was observed by a street parade of all the various labor organizations in this vicinity. Over 6,000 trades' unionists participated.



WOMAN CHASE ON A TRAIN

Constable Attacked by Members of a Burlesque Company.

Lebanon, Pa., Sept. 1.—Mae McDonald, a member of a burlesque company, made an exciting escape from arrest on a charge of perjury brought by H. E. MacDonald, of Brooklyn, N. Y., who is reported to be her husband. Constable John Fisher attempted to take her into custody as she was leaving the company for Altoona, but the members of the troupe interfered. When he got aboard the train the woman ran from one car to another, and as the officer essayed to follow her he was attacked upon all sides by those who were trying to shield her.

He found an apparently exhausted woman, whom he thought was the one wanted. She was taken out of the car, when it was discovered that she was not the right one. The train then pulled out. Constable Fisher telegraped to Altoona for the arrest of the entire troupe.

A Nervous Wreck Weak and Exhausted.

Could Scarcely Drag Herself About the House, But Found New Health and Strength and Gained Eleven Pounds While Using

DR. CHASE'S NERVE FOOD.

Take the case of Mrs. West, as described in her letter quoted below. She was pale, weak and run down in health. Her blood was thin and watery, and her nerves so starved and exhausted that she was prostrated. Dr. Chase's Nerve Food cured her, and added new, firm flesh to her body to the extent of eleven pounds. You will find her letter interesting.

Mrs. S. W. West, Drayton, Wellington county, Ont., writes: "About two years ago I got terribly run down, and finally became a victim of nervous prostration. I had no appetite, seemed to lose interest and ambition and could scarcely drag myself about. Hearing of good results from the use of Dr. Chase's Nerve Food, I used three boxes with great benefit. In a short time I gained eleven pounds, and as I was very thin when I began to use the remedy I was very proud of the increase of weight.

"Then the following spring I became rather poorly, and they again built me up, and gave me such a good appetite that I wanted to eat nearly half the time. I was so leased with the cure that Nerve Food brought about that I recommended it to others, and they have told me of the benefits they had obtained from this preparation. You may use this testimony in order that others may learn of the good there is in Dr. Chase's Nerve Food."

If you have been affected as Mrs. West has, if you are not feeling real strong and well, you will be surprised at the good that Dr. Chase's Nerve Food will do you. It puts color in the cheeks, rounds out angular and wasted forms, and brings new hopes, new confidence and new life to take the place of despondency, weakness and disease. 50 cents a box, 6 boxes for $2 50, at all dealers, or Edmanson, Bates & Co., Toronto.

Preparations are being made to demolish the upper part of the bell tower of San Stefano, Venice, which is showing sings of collapse.

About 1,000 diamond workers in Amsterdam are out of work.

IT IS THE FARMER'S FRIEND.—The farmer will find in Dr. Thomas' Eclectric Oil a potent remedy for wounds or pains in the body or for affections of the respiratory organs, and for household use generally. He will also find it a convenient friend in treating injured horses, cattle, etc., or relieving them when attacked by colds, coughs or any kindred ailments to which they are subject.

A HEAVY IRONING

can be done with less labor and worry when you use

BEE STARCH

Try it and prove for all time our assertion. The iron cannot stick to the linen—nor will the latter crack when BEE STARCH is used.

10 CENTS PER PACKAGE. SAVE THE COUPONS.

CUPID ON THE TOUR

Health-Seekers Were Wedded on the Way to Colorado.

Vineland, N. J., Sept. 2.—When the family physician announced that Miss Nellie Fenton must go to Colorado if she expected to regain her health, the heart of Timothy Carey sank within him, for he had been paying attention to Miss Fenton. The more he thought of the situation the worse he felt about it, and he evolved a plan to cast off the gloom that beset him.

"I'll go, too," said Carey, "for I don't believe my health will be any too good in this climate now."

A party of friends was made up to accompany Miss Fenton, and Carey's persistent pleadings, seconded by those of his sweetheart, won their consent to his joining the party.

On the train en route from Vineland to Camden, Carey and Miss Fenton sat together, and they suddenly surprised their friends by announcing their engagement. At the depot in Camden they gave further astonishment by stating their intention of getting married "right away" by the first clergyman they could find. So the party of tourists accompanied the couple to the residence of Rev. Charles Bowden, where they were made one. Lawyer Edgar R. Jones, of Vineland, acted as best man, and Miss Ruby Fenton, a sister of the bride, was maid of honor. Immediately after the ceremony the party of tourists went over to Philadelphia and boarded a train en route for Colorado.

CAUGHT RIFLING LETTERS

Atlantic City's Richest Colored Man a Postal Thief.

Atlantic City, N. J., Sept. 2.—Caught abstracting money from a special delivery letter in the local postoffice, Robert D. Barrows, colored, was arrested by two Government inspectors, who came here at the request of Postmaster Bacharach. Barrows was taken to the city jail, where he signed a written confession, and was then taken to Camden, where he will have a hearing before United States Commissioner Morgan.

The postoffice has been besieged all sason by complaints from residents and visitors who have failed to receive letters containing money sent them, and the whole force of clerks at the office have been under more or less suspicion. To relieve the situation and clear his clerks, Postmaster Bacharach asked the aid of the department. Inspectors Ryan and Holtby came here two weeks ago, and their suspicions soon rested on Barrows.

A decoy letter containing $7 in bills was dropped in the delivery box at the postoffice, and the place was watched by the inspectors. About 11 o'clock Barrows was seen to enter and abstract the money from the letter. He was followed as he left the building, and put under arrest.

Barrows was a trusted employe. He is married to a white woman, now in Scotland, and is said to be the wealthiest colored man in town. He was a chef on board Admiral Sampson's flagship during the Spanish war. For some years he was janitor of the Morris Guards' armory.

SURE REGULATORS.—Mandrake and Dandelion are known to exert a powerful influence on the liver and kidneys, restoring them to healthful action, inducing a regular flow of the secretions and imparting to the organs complete power to perform their functions. These valuable ingredients enter into the composition of Parmelee's Vegetable Pills, and serve to render them the agreeable and salutary medicine they are. There are few pills so effective as they in their action.

Recently messages were exchanged over the new cable via the Cape between Adelaide and London. A reply was received within three minutes.

Milburn's Heart and Nerve Pills cure Anaemia, Nervousness, Sleeplessness, Weakness, Palpitation, Throbbing, Faint Spells, Dizziness, or any condition arising from Impoverished Blood, Disordered Nerves or Weak Heart.
