Its Superiority Beyond Question Proved by United States War Department Tables.

The Value of the Mines Should Ensur for Them Adequate Protection.

plate in time of peace what would of necessity have to be supplied hastily under the pressure of any threat of war. Such a question would be fair matter for deliberation and decision at a colonial conference such as has been proposed.

"A fact may here be mentioned which illustrates by contrast the singular advantage which the Empire possesses from the command of abundant coal on the Pacific China and Astralia use it should be dearned to carry when if from the Pacific Coast to Europe from want of a return cargo use coal as ballast in voyeging from England to Australia, and are therefore able to deliver it in San Francisco almost as cheaply as it is brought from Vancouver. During the year 1892 San Francisco took about 600,000 tons of vancouver coal. The American steamship lines to China and Anstralia use it almost exclusively. It goes to the Sandwich Islands, to Mexico, and many other points on the Pacific, a circumstance which indicates how much Canada's stake on that ocean is increasing.

"Another suggestive fact should be men-"

NEW YORK, March 7 The steamer Adirondack, which arrived yesterday, confirms the news that the American yacht Natelle, rondack, which arrived yesterday, confirms the news that the American yacht Natelle, which took on board a lot of cannon, arms and ammunition at Savannab, for the revolutionists at Hayti, is still at Fort Alvent, which took on board a lot of cannon, arms and ammunition at Savannab, for the revolutionists at Hayti, is still at Fort Alvent, which took on board a lot of cannon, arms and ammunition at Savannab, for the revolutionists at Hayti, is still at Fort Alvent, which took on board a lot of cannon, arms and ammunition at Savannab, for the revolutionists at Hayti, is still at Fort Alvent, which took on board a lot of cannon, arms and ammunition at Savannab, for the revolutionists at Hayti, is still at Fort Alvent, which took on board a lot of cannon and ammunition at Savannab, for the revolutionists at Hayti, is still at Fort Alvent, which is character to carry watchi

Pacific, a circumstance which indicates how much Canada's stake on that ocean is increasing.

"Another suggestive fact should be mentioned. The American cruisers employed in guarding the seal fisheries in the Behring Sea have taken the larger part of their coal supplies from Vancouver. The manager of the principal mining company at Nanaimo told me that he had thus sent 5,000 tons to the Behring Sea for the use of American ships. The British cruisers were at the same time using Welsh coal, to which the preference was given, not from any superiority in steaming qualities, but because it was a smokeless coal and cleaner. The Admiral stated that he could see American ships several miles further than they could see him. The advantage of such a coal in time of war is obvious, but in war time the only coal obtainable would probably be that near at hand. I shall have occasion, however, to speak of smokeless coal again.

"The Vancouver mines furnish the Canadian Pacific company with fuel for their fast steamship service to China and Japan and for their railway service to the summit of the Rockies. Without these mines the Transcontinental railway and its ocean connections—in other words, the new postal, commercial, and military route to the East, could scarcely be an accomplished fact. In the West, then, as well as the East, on the Parific as on the Atlantic, Canada's coal measures are so placed as to give the greatest possible advantage for external and internal communication for the prosecution of commercial, and military route to the East, could scarcely be an accomplished fact. In the West, then, as well as the East, on the Parific as on the Atlantic, Canada's coal measures lying behind defended or defensible ports must be of more permanent worth than mere coaling stations which have to draw all their supplies across wide seas."

Gr defensions which have to oplies across wide seas.

Instituted for marder.

Chicago, March 8.—The spring term of the U. 8. court opened to-day. The most important case on the docket is that of Lieutenant Maney, of Bort Sheridan, indicted by the grand jury for the murder of Captain Hedberg under circumstances that have strateded wide attention both within and without army circles throughout the country. Maney is at liberty on \$10,000 bail. After the shooting he was relieved from military duty with residence in Chicago, and leave to visit Tennessee and Kentucky. He will continue to draw \$150 a onth until his case has been disposed of.

Bad Effects Entirely Eliminate Hood's Sarsaparilla.

"C. I. Hood & Co., Lovell, Mass.:

"Gentlemen.—In April last, through the effects of a dose of strychnine taken in mistake for another drug, I was laid up in \$8 I. John, N. S., for ten days. After this I never seemed to regain my former health, and continually surface from indigestion and heart palpitation, for which I could get no relief. I thought if would try Hood's Sarsaparilla.

Dr. John A. Duncan Expresses His Opinion as to Their Superfluity

Mr. F. V. Warmall Toronto, Ontario.

A Narrow Escape

E.M.JOHNSON

The following passage from the article on "Canada" in the London Times of the 18th thit, will no doubt be of much interest to our readers: "When we cross the continent to the Pacific coast we find, in connection with the coal of British Columbia, a group of facity ecarcoly less striking than those to which reference, has already been made. Along the whole Pacific coast of South America on coal is found suited for steaming purposes; now one along the coast of North. There is more along the coast of North. There is more along the coast of North America until we come to Puget Sound, At America until we come to Puget Sound, and America until we come to Puget Sound and A

This Property dold, Silver and Coal Mines in West Kootenay. The population of this district will increase this year by at least 10,000; the area of farm hand is very limited, and from this it may be fairly asserted that beef and all classes of farm produce will find a ready and lucrative market. The soil is the best bottom land, and the locality is one of the few places in the Province where so large a piece of good farm land can be found in one blook. A river runs through the property, and rainbow trout are plentiful and afford capital sport. Deer abound in considerable, There are two creeks recorded and belonging to the estate, one flows all the year round. Limestone and brick clay are to be had in the valley.

BONANZAI

To any person or corporation having the capital and knowledge necessary to develop and work this estate. A store, hotel and blacksmith shop could be run in connection with the farm.

CORONERS' INQUESTS.

Dr. John A. Duncau Expresses His Opinion as to Their Superfluity in Certain Cases.

Coroner Hasell States His Position—Inquiry Toughing the Death of Jacques Pacific, not for the purpose of delivering an address to the jury on the destinability or an accessity, of inquests. It was not for the doctor to say whether or not an inquest was mecasity. There were, unfortunately, the an inquest held in the police court room yesterday afternoon, touching the desth of Jacques Pacific, the clicity Frenchman who was found in a dying condition in his cubin. on Figsact street, last Tousday, under click of the purpose and the police court room yesterday afternoon, touching the desth of Jacques Pacific, the clicky Frenchman who was found in a dying condition in his cubin. on Figsact street, last Tousday, under click of the Jublies houghtal. The jury was composed of Mesers. A Friendly (forman).

Dr. John A. Duncau was the first witness examined, in laving been summond to attend the old man when he was found juing insensible on the floor of his cabin.

The lower has the position of the heart and the juing insensible on the floor of his cabin.

The lower has the lower of the body with the lower before M. Marboard's Chimses kitchmans and the destor came.

Dr. John A. Duncau was the first witness examined in the coronic of the heart and the juing insensible on the floor of his cabin.

The lower has the lower of the body with the lower before M. Marboard's Chimses kitchmans and the destor came.

Dr. John A. Duncau was the first witness examined in the lower of the body with the law of the lower of the body with the lower of the body with the law of the lower of the body with the law of the lower of the body with the lower

statement that he believed the man must have lain on the floor 24 or 36 hours and that of the Chinaman who said he heard him fall out of bed the same day. Again Dr. Duncan had expressed his conviction that the man had died of want and exposure, while the evidence of Dr. Lang, who had made the post mortem and was therefore the most important witness of the day, showed the cause of death to be entirely different. The jury would also consider whether or not Paetie's death had been in any way hastened by his removal to the

whether or not Pastie's death had been in any way hastened by his removal to the haspital, as had been indirectly suggested by one witness.

After a brief consultation the jury announced that they were ready with their verdict, and presented it verbally—that the deceased came to his death by natural causes. Asked to specify these causes more particularly, the jury added "dropsy of the lungs, induced by fatty degeneration of the heart and failure of the main artery thereof," supplementing the verdict proper with a rider to the effect that death was not in any way accelerated by the removal of the deceased to the hospital.

The funeral of Jacques Pastie, on whose body the inquest was held, will take place at 9 c'clock this morning, at the same time and in connection with the tuneral of Peter Sene, a Canadian, and 80 years of age, who died at the Jubilee hospital yesterday. Both were members of the Roman Catholic church, and will be buried from St. Andrew's Cathedral.
