A Wolf Story from Russia. From The London Daily News.] In many of the southwestern districts of Russia the wolves are this season showing unusual temerity in raiding sheepfolds and unusual \*temerity in raiding sheepfolds and attacking not only horses and cattle, but stray wayfarers along the highways and bypaths traversing or skirting the forests. A few days ago a peasant on foot and a sleeve-maker driving a single horse tarantass were towards nightfall approaching the village of Pianje, near Dubno, when they were startled by the chase cry of a wolf pack in their rear. The peasant fied and reached the village in safety. The horse and tarantass, which had been some little distance behind the peasant, dashed into the village a few minutes later, but without their owner. The next morning the poor sievemaker's bones were found scattered about the spot where he had been attacked and dragged from the vehicle by his ravenous pursuers, while the unfortunate man's head was discovered in a dreadfully mutilated condition nearly half a mile away. nearly half a mile away.

JOHN STARK & CO 26 TORONTO-STREET TIPS FROM WALL-STREET.

John J. Dixon & Co. received the following espatch over their private wire from Henry John J. Dixon & Co. received the following despatch over their private wire from Henry Ailen & Co. to-day:

New York, Jan. 9.—The stock market has shown much new strength, and that of a very substantial sort, to-day. Many of the Industrials have been buoyant, notably Sugar and Chicago (as, but much the most encouraging feature has been the increased activity and strength shown in the general raliway market. This applies particularly to the Grangers' stocks. Under the leadership of R.I. they have all been conspicuously strong to-day, and some of them have advanced materially. This development has been anticipated for some time by close students of Wall-street situation. It will mean much for overy department of birsiness in the Stock Exchange district. It does not represent manipulation, but is the direct outcome of a growing

PUT THEM ON YOUR LIST. FRANCIS' PATENT METAL LOOP HOOKS AND EYES.

Previous to this invention a great deal of labor was expended in making loops of thread, and in covering up the old fashioned unsightly eyes, which required to be sewn on. The new loops are so made as to be set to place instantly. They can be readily removed if necessary without disfiguring the fabric; very little, if any, sewing is necessary. Clothing manufacturers are united in praising them them, the larger sizes being just what they want for Cape Overcoats and Children's Suits. For Children's Dresses there is nothing else which does so well for a fastener and the Leading Dressmakers endorse them after a trial.
