

THE
Two Year Course
AT THE
Ontario Agricultural College,
Guelph

Is within the reach of all farm boys

BECAUSE

Ordinary public school education is sufficient for admission to the course.

The College Year begins September 19th and ends April 15th, so that students from the farm may return to their homes to assist in the Spring and Summer work.

Five months during the Spring and Summer gives many students opportunity to earn sufficient money to defray College expenses for the following year.

The tuition fee for Ontario students for two years is only \$20.00 per year while the lowest possible rate is charged for board and room in residence.

A portion of the cost the first year is defrayed by work on the farm and the various departments.

Students wishing to take the full Four Years' Course for the degree of B. S. A. conferred by the University of Toronto, do not require matriculation standing. Students are accepted for this Course if their standing on second year examinations warrants it.

College Opens Sept. 19th,

1919.

Write for a College Calendar which gives full particulars
