

Diseases of the Nose, Throat and Ear, and Their Accessory Cavities. By SETH SCOTT BISHOP, M.D., D.C.L., LL.D., author of "The Ear and Its Diseases;" Honorary President of the Faculty and Professor of Diseases of the Nose, Throat and Ear in the Illinois Medical College; Professor in the Chicago Post-Graduate Medical School and Hospital; Surgeon to the Post-Graduate Hospital and to the Illinois Hospital; Consulting Surgeon to the Mary Thompson Hospital, to the Illinois Masonic Orphans' Home, and to the Silver Cross Hospital of Joliet, etc. Third edition. Thoroughly revised, rearranged and enlarged. Illustrated with 94 colored lithographs and 230 additional illustrations. 564 pages, royal octavo. Price, extra cloth, \$4.00 net; sheep or half-russia, \$5.00 net. Philadelphia: F. A. Davis Company, publishers, 1914-1916 Cherry Street.

Ever increasing literature, the introduction of new remedies, methods of treatment, improved instruments and apparatus, have necessitated this third edition of a very practical and reliable book on the Diseases of the Nose, Throat and Ear. Apparently no effort has been spared to make this edition representative of the most advanced work up to the time of publication. The larger part of this volume is devoted to nose and throat; diseases of the ear are well treated of in Part IV. The production from the publishers' standpoint is all that could be desired.

Essentials of Materia Medica and Prescription Writing. By HENRY MORRIS, M.D., College of Physicians, Philadelphia. Sixth edition, thorough revised. By W. A. BASTEDO, Ph.G., M.D., Tutor of Materia Medica and Pharmacology at the Columbia University (College of Physicians and Surgeons), New York City. 12mo volume of 295 pages. Philadelphia, New York, London: W. B. Saunders & Company, 1904. Canadian agents: J. A. Carveth & Co., Limited, 434 Yonge Street, Toronto. Cloth, \$1.00 net.

Dr. Bastedo, in making the revision of Dr. Morris' "Essentials of Materia Medica," has furnished the student with a work complete and up to date in every particular. Much of the text has been in great part rewritten. There have been introduced articles on adrenalin, stypticin, and on the iodine and silver synthetics. The present sixth edition is all that could be desired.
