

# John Ballantine & Company

PRESTON, LIMITED - ONTARIO  
MANUFACTURERS OF SUPERIOR

## WOODWORKING MACHINERY

The Best Pony Planer made 16 in., 20 in. and 24 in. wide. All rolls driven.

**Buy a Ballantine Machine and be up-to-date.**

This is no idle claim. We were the first firm in Canada to use Cut Gears on woodworking machinery, Variable Feed rip saws and the Independent Down Drive on moulders and many other improvements that have since been universally adopted though often at first subjected to considerable ridicule by other manufacturers. The same energy and enterprise still keep us abreast of the times and we are constantly adding to our establishment all the best equipment and also constantly adding new features to our machines. We do not claim to have reached perfection yet though some users of our machines have been kind enough to say it for us.

**BALLANTINE'S—THE BEST.**
