Recent conflict experiences in cold climates have demonstrated clearly the need for powerful and dependable heating systems. To meet this need, Scanvent Heating and Ventilation Ltd. has developed the Vacan Mobile heater which specializes in mobile heating systems for all applications.

The Vacan Heater is a new and unique heating system, designed specifically to operate efficiently in extremely cold conditions. It provides large capacity and is simple to handle and to connect. The Vacan Heater uses a sophisticated system

of heat distribution to provide the correct temperature throughout the heated area.

The Vacan Heater has been designed for use in tents, barracks, field hospitals, aircraft, vehicles
