They have some powerful Presses by Adams and Hice, the most celebrated American makers, worked by a Model Steam Engine, together with a large and varied stock of new type, which is being constantly augmented by the addition of every novelty, as produced, for Ornamental Printing. But of their capabilities in this matter they are fortunately not required to say much. As samples of the work performed by them, they may point to the Canadian Journal, the monthly organ of the Canadian Institute, the execution of which has been affirmed to be of a character that would do credit to the oldest Printing Houses in Europe; or if the reader has not seen that publication, they need only refer to this present work—THE CANADIAN ALMANAC. They do not hesitate to say that it will bear a favorable comparison with any similar production published in any part of the world. Those who are conversant with the getting up of an Almanac—who know the double necessity resting upon the compilers, of embodying the latest information, and yet publishing early in the fall, and the consequent haste with which it is printed, will look upon it as a marvel of elegance and correctness. in the highest style of art, at a price far below that of Engraving on Copper or Steel, and in many instances not perceptibly inferior in execution. They would call the especial attention of Land Owners, Surveyors, and all others who may require plans of property, to this department. M. & Co. believe that during the past season, the majority published have been issued from their office, some of them of so elaborate and finished a character as to take the position of works of art, and those who are interested in such matters should remember that a well-executed plan is an essential element in the successful disposal of all kinds of real estate. Parties requiring such work will do well to visit their establishment, as from the experience and constant practice of their workmen, they are often enabled to make valuable suggestions for its effective execution. Lithographic Printing in Colors with accuracy and elegance. Business and Private Cards, Bill Heads, &c., engraved on Copper Plate and printed. Envelope Dies cut, and Envelopes stamped, either plain or in colors.

The Bindery is complete in all its details, including facilities for binding in every style, from the cheapest to the most elegant, in any quantity, at reasonable prices and on the shortest notice. By their Ruling Machine they can execute any desired pattern in Blank Books, and having recently added a Paging Machine, they are prepared to furnish Account Books paged throughout; also to page books (old or new,) at a very small charge. They believe that the resources at their command in every department of their establishment are unsurpassed in any part of the Province. The very flattering amount of patronage bestowed upon them since entering upon the business of the late Hugh Scobie, has encouraged them to spare no expense in perfecting their working plant, and in adopting every improvement to facilitate the execution of orders entrusted to them; and they are determined by the employment of first-rate workmen, by attention, punctuality and economy, to merit a continuance and increase of the same favors.

\*.\* The Publishers of the Canadian Almanac regret that in consequence of the pressure of Advertisements, they have been obliged to refuse several applications for space, also to leave out a list of their own publications, which they had prepared.
