The premises were owned and occupied by Frederick Elliott, and Mrs. Elliott and her two young children were asleep in the house when the fire broke out, but Mr. Elliott and eldest son just returned in time to give the alarm. Charge Not Proven.

A charge was preferred against Thomas Lowther of having liquor conveyed to the licensed premises of John O'Mara at New Toronto and taking it from there to his home. Rev. Stuart Ferguson swore that he had spoken to Lowther, who had a parcel under his arm, which contained bottles, and was told that they contained liquor. How Thin People Can Put On Flesh

(ADVERTISEMENT.) *

A New Discovery. Thin men and women—that big, hearty, filling dinner you ate last night. What became of all the fat-producing nourishment it contained? You haven't gained in weight one ounce. That food passed from your body like unburned coal through an open grate. The material was there, but your food doesn't work and stick, and the plain truth is you hardly get enough nourishment from your

was there, but your food doesn't work and stick, and the plain truth is you hardly get enough nourishment from your meals to pay for the cost of cooking. This is true of thin folks the world over. Your nutritive organs, your functions of assimilation, are sadly out of gear and need reconstruction.

Cut out the foolish foods and funny sawdust diets. Omit the flesh cream rub-ons. Cut out everything but the meals you are eating now, and eat with every one of those a single Sargol tablet. In two weeks note the difference. Five to eight good, solid pounds of healthy, "stay there" fat should be the net result. Sargol charges your weak, stagnant blood with millions of fresh, new, red blood corpuscles—gives the blood the carrying power to deliver every ounce of fat-making material in your food to every part of your body. Sargol, too, mixes with year food and prepares it for the blood in easily-assimilated form. Thin people gain all the way from 10 to 25 pounds a month while taking Sargol and the new flesh stays put. Sargol tablets are a scientific combination of six of the best flesh-producing elements known to chemistry. They come 40 tablets to a package, are pleasant, harmless and inexpensive, and all druggists sell them subject to an absolute guarantee of weight increase or money back.
