Goderich Tried to Be Sharp.

Berlin, Feb. 22.—Berlin still has a team in the running for intermediate honors in the O. H. A., and if they put up the pace of to-night, when Goderich was defeated by the score of 14 to 8, for a total of 24 to 16 on the round, the team will make a strong bid for the championship. Goderich tried a scheme ffat, falled to work. Belycher was unable to play owing to injury received in the first game, and the Sailors brought McIvor, an expelled O. H. A. player to take the former's place, McIvor was spotted, however, and Mascot McDonald donned a uniform. He only lasted two minutes, as he fell down when the referee's back was turned and was carried off the ice, altho nothing was the matter. Roschman had to go off, the balance of the game being played six a side.

The score was tied three times, and then the locals took advantage of Goderich's lack of condition by bombarding. McIvor in a merciless manner, scoring seven goals, while Goderich only tailled one. Referee Whitehead kept the game clean, only four players being fenced. He gave good satisfaction. The teams were:

The play was strenuous enough to satisfy the most enthusiastic Pittshurg fan, and several of the players carried nasty scars when the contest was over. The New Yorkers showed a tendency to hix things up, and the locals commenced to play a similar brand of hockey.

Miller starred for the home team, scoring six of the seven goals. Moore got the other. Liffiton was the best of the Crescents, scoring three goals, Kennedy netted the other one. The first half was played under O. H. A. rules and the second under American rules, which do not allow skating a man on side. The teams were:

by the attendance at Massey Hall last night for the lecture by Bicknell Young of Chicago, has attained considerable numerical strength in Toronto. The body of the ground floor was comfortably filled, while the lower gallery also held a number of interested listeners.

Mr. Young, who is a member of the lectureship board of First Church of Christ, Scientist, Boston, showed himself the possessor of a polished style, and of a smooth delivery. His exposition of the principles of Christian Science was celar and forceful. Christian Science, he said, might be defined as the science of all that re-

lated to God, and was science not only in relation to healing, but as corrective in relation to all problems of existence. Accepted theories of religion and science had scoffed at the association of the words, but reason and logic showed conclusively that science must relate to truth, and therefore to God, since God was the cause and basis of all that was true. Of all people, Christian Scientists believed most absolutely in Christ. They declared that His command to heal the sick was as binding as that to preach the gospel, and that there was no evidence that it was intended for no evidence that it was intended for His time only. It was scientific re-ligion that healed the sick in the C. McIredale.
