

43RD YEAR NO. 17910

THE ADVERTISER, LONDON, ONTARIO, MONDAY, AUGUST 20, 1906.—TEN PAGES.

PRICE TWO CENTS.

EARTHQUAKE REFUGEES PUT DEATH LIST IN THOUSANDS

Many Cities Adjacent to Valparaiso Are Reported To Be Badly Wrecked.

TWO-THIRDS OF THE CAPITAL IS IN RUINS

Eighty Distinct Shocks Felt and Populace Were Thrown Into Awful Panic—City Plunged in Darkness and Water Mains Rendered Useless to Fight Flames.

Santiago, Chili, Aug. 20.—Five hundred persons are dead at Valparaiso as a result of the earthquake shocks, according to the latest advices based on the reports of refugees who reached this city this morning. The monetary loss at Valparaiso runs into the millions. Six or eight other cities have been destroyed. The railroad, street railway, telegraph, and telephone systems are thoroughly demoralized.

The known dead in this city number twenty. Madame Mont, wife of Admiral Mont, who was reported killed, is alive, but seriously injured. It is expected that the street railway and lighting systems in this city will be restored today.

Lima, Peru, Aug. 19.—The latest news from Valparaiso is to the effect that the panic is subsiding. The mansion of Mr. Edwards is about the only building remaining on Victoria street.

It is estimated that the number of dead in Valparaiso will reach 1,000. The dead in other places are: At Quillota 30, Limache 1770, and Petorca 11. Among the killed at Valparaiso were the director of the Lyceum; Charles Hessel and family.

Refugees, who are arriving at Santiago from Valparaiso on horseback, and who left there during the worst panic, bring wild stories concerning the number of deaths by the earthquake and fires. These refugees say the deaths number 10,000, and that there are 6,000 refugees in the mountains.

One rumor, which is not confirmed, and is believed to be untrue, is that the dead number 11,000, and the injured 60,000. Public relief subscriptions were opened in Buenos Ayres today. The Jockey Club gave 60,000 pesos. The Argentine Government will pay an appropriation for the relief of the sufferers.

London, Aug. 20.—The Chilean legation today received a cable message from Santiago, dated yesterday, reading as follows: "On the evening of Aug. 16, a severe earthquake was felt between Valparaiso and Talca. The loss of life was not very great. The damage to property was considerable at Valparaiso, but was less at Santiago. Public order has been entirely maintained. The authorities and private persons are succoring the distressed people. The foreign legations are lending aid. The north has been wholly unaffected by the earthquake."

Private cable messages received by members of the Chilean legation tend to show that Valparaiso did not suffer as much as was at first supposed. The heaviest damage was confined to the eastern section of the town, which included the poorer residential district. The port and shipping at Valparaiso apparently escaped damage.

A Liverpool firm today received the following dispatch from Santiago: "I do not think that there has been any loss of life or personal injuries among the English residents at Valparaiso. The fires and shocks are apparently over."

(Continued on Page Nine.)

DOUBLE DROWNING CRACK BRITISH NEAR WINGHAM

Boy Plunges in to Save Comrade and Both Go to the Bottom.

Wingham, Aug. 19.—A sad drowning accident occurred here today. A number of boys and young men were bathing in the Matland, when Frank Moe got beyond his depth, and, being unable to swim, was seen to be in danger. Clayton Grisdale, seeing his comrade's danger, jumped in. He was at once clasped by the drowning young man, and both sank together.

Another young man, Harold Buchanan, also plunged in, and was seized by Grisdale and had hard work to escape being dragged under.

The alarm was given and Mr. Albert Fleming secured the bodies. Medical men were speedily at the scene of the accident, but found life extinct. Both were young men of good character and about the same age.

CLIMBS PIRE

London School Boy Performs a Daring and Spectacular Feat.

London, Aug. 20.—One of the boys of Oundle School accomplished a daring feat recently.

Without the aid of mechanical appliances of any kind he climbed to the top of the spire of Oundle Church, 250 feet high.

The boy climbed by the aid of the stone crotches, or projections, on the steeple, and to prove he had accomplished the feat he tied his handkerchief to the weather vane.

Twenty years ago another pupil of the school named Bailey—now a well-known doctor—climbed the steeple and tied his bootlace to the vane.

When he came down he received a sound thrashing and a sovereign from Mr. Reade, the head master.

EXPULSED BY RUSSIA

Odessa, Aug. 20.—An American citizen named Glinson was expelled from this city and taken to the western frontier by order of the government-general. Glinson was temporarily arrested a few months ago as an alleged political provocateur agent, and on a charge he was rearrested a few days ago and expelled from Russia. Ambassador Meyer said he saw no reason to protest against the action. Glinson is a Russian Jew, who recently took citizenship papers.

DIED OF STARVATION

Post Mortem Examination Over the Remains of Late Ed. Grosvenor.

A post-mortem examination held on the remains of the late Edward Grosvenor revealed the fact that he died of starvation. He suffered from no disease sufficient to cause death. Grosvenor had been three times in Victoria Hospital within a year.

WHAT LONDON WILL NEED

Special Committee Inquiring About Power Required Here.

Aid. Matthews, who is an officer of the association formed at Galt to further the Niagara power project, has received a letter notifying him that it is the intention of the special committee appointed to ascertain the amount of power that London and the other interested places will require, so that the association will be able to go to the Ontario Government and say: "We want so much power. How much will you sell it to us for?"

CARS BLOCKED AGAIN

Street Railway Makes Complaint About G. T. R. Trains.

The London Street Railway Company today registered a formal complaint with City Engineer Graydon, against the Grand Trunk Railway, which, the street railway people allege, blocks the trolley system every day on Richmond street from 10 to 20 minutes shortly before noon.

Today the street cars were blocked ten minutes, and the people waiting for cars blamed the street railway. Mr. Graydon will bring the complaint to the attention of the Grand Trunk at once.

ADVICE NOT WANTED

King and Kaiser Not Likely to Interfere With the Czar.

St. Petersburg, Aug. 20.—The Czar concluded a four days' visit to the Krivov-Selo military maneuvers Friday evening. He was fully satisfied of the loyalty of those picked regiments which were under his review. His reliance on them continues to form the very foundation of the Government's policy. Certainly no advice on the subject has been tendered from Friedrichshof. No section of Russian society supposes that either the English or German sovereigns regard the Russian situation as a matter for foreign advice. The accepted view is that the meeting of the King and the Kaiser was an unavoidable rencontre of courtesy that would have been really ominous if it had not taken place.

The Petersburg Zeitung, to the official mouthpiece of Russo-German amity, adopts a moderate tone in discussing the meeting of the two sovereigns. It describes King Edward as a good judge of men, who has known how to manage his relations with his imperial nephew, but does not think it necessary to magnify that fact. The article concludes:

"King Edward once again avoids Potsdam and Berlin, but apparently will visit the imperial palace at Vienna on his return from Marienbad. There speaks in a few lines a Blue Book."

This suggested friendliness toward Austria was not shared here, where there is growing repugnance toward the grotesque distortions of the state of affairs in Russia published in the foreign world in the shape of dispatches from Vienna.

'QUAKES' AT MARTINIQUE

Seismic Shocks There Yesterday and Today, But No Damage Done.

Fort-de-France, Island of Martinique, Aug. 20.—Earthquake shocks of less severity were felt in the island of Martinique at 1:15 p.m. yesterday, and at 3:47 a.m., 4 a.m., and 8:20 a.m. today. No damage was done.

ACTOR MORRISON DEAD

Won Fame as Delineator of Mephisto in Drama of Faust.

New York, Aug. 19.—Lewis Morrison, the actor, whose work as Mephisto, in "Faust," gained him fame, died suddenly of shock yesterday in St. John's Hospital, Yonkers, after undergoing an operation for stomach trouble.

HOB BELENZOFF ESCAPED

Daring Bandit Completely 'Fooled' Guard on Way to Trial.

St. Petersburg, Aug. 20.—Col. Solovieff, who investigated the escape of Belenzoff, leader of the band which robbed the Credit Mutual Bank of Moscow of over \$400,000 in March last, and who recently escaped from the train on which he was being conveyed under guard from Switzerland to Warsaw, on his way to Moscow for trial, has found that his escape was entirely due to the gross carelessness of the guards. Instead of jumping through a window of the train, Belenzoff was in the toilet-room, with a guard outside. The prisoner locked the door, raised the window, quietly lowered himself to the step of the car, and jumped off. His escape was not discovered until half an hour later. The gendarmes who formed the guard, and who suppressed the true facts of the escape have been summoned to St. Petersburg, to answer to their neglect of duty.

FOREST FIRES.

Duluth, Minn., Aug. 20.—Absence of wind is today keeping in check forest fires on the Mesaba and Vermillion ranges. Millions of dollars' worth of property in towns and in mines are in peril, and escape depends on the direction and force of the wind. People at various points are "back firing" to prevent the encroachment of the fires.

ROCKEFELLER ILL.

Cleveland, O., Aug. 19.—John D. Rockefeller is confined to his bed at Forest Hill, his suburban home, as a result of stomach trouble. Mr. Rockefeller's condition is said to be not serious, and he expects to be out again within a day or two.

BABY KILLED IN A RUNAWAY

Little Daughter of a London Lady Meets Instant Death Near Inwood.

The little 1-year-old daughter of Mr. and Mrs. Charles O'Dell, of 109 Inker-man street, was killed, and Mrs. O'Dell was very seriously injured, in an accident while driving from Inwood to visit the home of some friends on Saturday afternoon. So far as can be learned, Mrs. O'Dell and her little child were met at the station by friends, and were being driven to their home, when the horses ran away, and all the occupants of the rig were thrown out. No definite account of the accident has yet reached the city, but it is reported that Mrs. O'Dell is in a very serious condition.

Mr. O'Dell left for Inwood early Sunday morning, but nothing has been heard from him since.

FOR HEAVY HAULS

Grand Trunk Have New Passenger Engines on Middle Division.

The Grand Trunk has placed a number of new passenger locomotives in service on the middle division. The engines are very similar in appearance to those of the 800 class, and while they are not capable of greater speed, it is said that they will haul heavier trains. They are numbered in the 1,000 class.

Several of the locomotives have been running on the fast trains between Toronto and Niagara Falls and on the old main line between Sarnia Tunnel and Toronto. As none of them have been engaged regularly on the main line from Sarnia Tunnel to the Bridge, although they have made a number of special trips between those points. On all of the through trains touching London, the locomotives of the 800 class continue to do service.

THEATRICAL MATTERS SIZZLING; MR. SMALL IS OUT OF GRAND

Alleged Complications as to Bookings for Mythical 'Garrick' Theater.

Theatrical matters are beginning to sizzle in London at the approach of the season of 1906-07.

Interest appears to center in the Grand Opera House, owing to the change in management there, though quite a little talk is heard of Bennett's prospects and the chances for the opening of the new house by the 1st of October.

For some rather unaccountable reason, employees of Mr. A. J. Small in this city have persistently stated that Mr. Small will again control the house next season.

The alleged matter is, that Mr. Small is out of it, and that Fitzpatrick & Stewart are masters of the situation.

Mr. Small has chosen to retain the theater to the last minute of his lease, and the new lease will not be taken over of the carpets, etc., of the theater, but no agreement was reached.

Something will have to be done right away, for the house comes into Mr. Stewart's hands a week from next Saturday.

Mr. Stewart is now in New York, making final arrangements for the bookings for Labor Day and fair week.

It is said that Mr. Small this summer made several unsuccessful attempts to buy the Grand Opera House here, but he could only secure the house subject to the lease held by Fitzpatrick & Stewart. As this lease has five years to run, the purchasing of the theater would not help the Toronto man.

Bennett's Theater. Bennett's new Vaudeville Theater is going rapidly ahead. Work is being rushed all day, and the management hopes to have the curtain rise for the first performance not later than Oct. 1.

The house will be one of the finest in America. When the theater is opened the people of London will be treated to the same class of vaudeville as is seen in New York, Boston and other cities, with the exception of a very large headline, some of which cost as high as \$1,000 a week.

Time is Up. Last week Mr. Fitzpatrick called on Mr. Small in Toronto and tried to come to terms with the Toronto man regarding the taking over of the carpets, etc., of the theater, but no agreement was reached.

Something will have to be done right away, for the house comes into Mr. Stewart's hands a week from next Saturday.

ALD. FORRISTAL SUFFERS INJURY

Fell in Quebec and Hurt His Knee—Mayor Judd Home from Halifax.

Mayor Judd arrived home from Halifax today, and brought the news that at Quebec Ald. Forristal fell and sustained a bad injury to one of his knees. The alderman is now in a hospital in that city, but it is expected that he will arrive home tomorrow.

Ald. Stevenson, who is a physician, remained with the patient in Quebec. The mayor reports having had a splendid time. At the convention of municipalities many papers of importance were read, and much of interest to the city of London was dealt with.

Ald. Cooper is acting mayor today, and he remarked in the mayor's office to the newspapermen that it seemed rather peculiar to him that none of the city's representatives were asked to meet the bowlers when they arrived at the depot at 9:45.

The alderman had quite a number of callers today, but he had no weightier business to transact than the signing of a number of checks.

GROWS FIGS IN LONDON

East End Resident Has Tree Well-Laden With the Fruit.

Mr. Albert E. Roberts, of 863 Dame street, East London, has a curiosity in the form of a fig tree, well laden with fruit. Mr. Roberts is a native of the island of Guernsey, England, where fig-growing is carried on to a large extent, the climate being well adapted to it. During the last fifteen years of his residence in this city, he has cultivated a tree, which has reached a height of seven feet or thereabouts, and each summer bears a good crop of the fruit, the figs being as large as pears. The tree thrives well during the warm weather, but in the winter it has to be kept indoors, the climate being too severe for it.

Starved Himself to Death; Old Man Was Tired of Life

Edward Grosvenor Dies in Victoria Hospital Under Peculiar Circumstances.

Edward Grosvenor, the old man who was picked up in an unconscious condition on the line of the C. P. R. in London Township, died in Victoria Hospital at 7:30 last night.

The case is one of the most puzzling that ever came under the notice of the hospital physicians.

Grosvenor, it is alleged, was tired of life, and simply starved himself to death.

In the hospital he was offered food, but refused it. After several attempts the physicians forced the patient to take nourishment. The result was unsatisfactory, however, and Grosvenor gradually grew weaker until the end came.

The sectionmen of the C. P. R. who found the old man also state that he refused to take food from them when they offered it to him.

Grosvenor was not altogether unknown to the police and the charity officials.

A local doctor who examined him, and who had attended him before, informed Inspector McCullum that there was nothing wrong with Grosvenor other than a bad attack of laziness. This same doctor was also under the impression that the man was not as old as he claimed, 68.

It is said, too, that had Grosvenor wanted to live he would have recovered, but he appeared determined to die.

It is said that Grosvenor had a wife living in the township of Metcalfe. He was born in England, but had spent most of his life in this country.

So far as known he was a wanderer with no place to call home, and no desire for a home.
