

LET RUSSIAN OFFICERS BE PUNISHED DEMAND LONDON MORNING PAPERS

ROJESTVENSKY CRAZY.

Paris, Oct. 25.—The Matin's Cherbourg correspondent reports that he interviewed the commander of the Russian torpedo flotilla which left that port Monday, who said that during Tuesday night a wireless message from Vice-Admiral Rojstvensky had been received as follows:

"Redouble precautions and vigilance. Enemy signalled in channel."

lon to greater firmness in demanding that the amplest reparation shall be made without delay.

Hull is expressing the hope that there should be a demonstration against Count Benckendorff, the Russian ambassador, who, personally, is credited with a feeling towards Great Britain. "The Standard declares that such a foolish demonstration is not warranted."

The Daily News claims to have obtained the following statement from Count Benckendorff:

"I am ill with the fatigue of a long journey and anxiety, but I authorize myself to say to the people of England, that I am absolutely certain that what occurred was a deliberate and premeditated act."

And my country's regret, it is, I am sure unnecessary for me to speak of."

In order that there should be no possible doubt as to the cause of the occupation of the fishermen killed by the fire from the Russian warships in the North Sea, the foreign office has communicated to the Hull coroner a request "that the bodies from the Cranston be photographed and submitted to a medical testimony called to show that the grasp of articles in the deceased's hands was not the result of death and not to being subsequently placed there."

The articles referred to are a hatch knife found in the hands of the dead captain of the Crane. It is understood that the bodies of the two dead men and men to examine the bodies.

**THE BESSEMER GOLD MEDAL
GIVEN TO ANDREW CARNEGIE**

Opening of the Iron and Steel Institute in New York Remarkable for This Fact.

**WANT TO KNOW SOMETHING
THEN GO AND ASK MISS FAY**

Attractive Young Woman and Her Mysterious Power Amazed Audience of 2000 Last Night.

New York, Oct. 24.—The opening exercises of the American meeting of the Iron and Steel Institute were held to-night. The session was marked by the presentation to Andrew Carnegie of the highest honors that the institute can bestow, the Edgemoor gold medal. Mr. Carnegie is the first American to become president of the association, its purpose being made up chiefly of the ecologist, the Anna Eva Fay party presents no great difficulties, and the chief of an ethical character. To the ordinary man, and we are all ordinary men, the performance is an inexplicable miracle and an exhaustless source of wonderment. About 2000 people saw the little lady last night, when they have told their friends that it is safe to say standing on the platform, only space available in the Massey Hall for the rest of the week.

men. The ward-to-night was made because of his lifework in the development of the iron and steel industry of the world.

President Furness of the board of aldermen welcomed the foreign visitors. Mr. Carnegie, in reply, returned thanks for the cordial reception.

At the meeting held here,

12 years ago, he said: "Upon our last visit the institute was amazed at your extraordinary production. As time went by, it grew so rapid as it has been, it proceeded at even quicker pace since then. The figures are positively staggering. Your production of pig iron has grown from 100,000 to 2,000,000 tons; in 1903 it was over 18,000,000 tons. Thus in 13 years it has doubled. In Bessemer

From the production of open hearth steel to the increase is more than elevenfold—from half a million tons in 1890 to nearly six million in 1930. The production of pig iron and steel manufactures has increased nearly threefold. In the decade, 1890 to 1900, you added 15,000,000 to your population and the national wealth increased by \$10,000,000,000, or ten billions of dollars. No wonder we come to see

for ourselves and study such portraiture grows.

It is the source of intense satisfaction open to our British members in doing so; for they cannot fail to remember that the great source of the development of the iron and steel industry here, it is to their older lands that you are indebted for the inventions which have raised such wonderful monuments resplendent.

The sliver cabinet was resorted to for

"The Institute congratulates the republic on this surprising increase. Your growth has not been without sacrifice. The demands of the world have increased quite as rapidly as all the iron and steel-making nations have been able to supply. And looking toward the future, the question is not how various lands are to find a market for increased iron and steel production, but rather how they can avoid other incidents during which Miss Phipps would be required to wear bandages, and soiled with court plaster bandages, and given no opportunity at all to do anything except to wait until her instructions were in vain, and where a hobnob or an arlet is the service of Miss Phipps' special duty." "I am glad," said Prosper himself could not rule him more imperiously.

As An Information Bureau.

duction, but the fact that the world is growing and the ever-increasing population and of the new developments of the world are to be met at reasonable prices.

James Kilson, former president of the Institute, delivered the speech of presentation.

In replying Mr. Carnegie said: "I owe much to you, getting around me men better than myself. There are three

gases of men in a world—men who go thru the world and do not receive what they deserve, and men who do receive what they deserve, and men who receive more than they deserve. I feel that I am in the latter class.

My dear mother, I am glad that you are the patents of a true nobility. This medal I hope to hold and pass down to my descendants as I received it from you.

BYRON WALKER'S GIFT.

Valuable Collection of Fossils
Awaits Suitable Possession

University Monthly: Byron E. Walker, D. C. L., general manager of the Canadian Bank of Commerce, has been the generous donor of a valuable collection of fossils to the University of Toronto. The collection consists of a number of fine specimens of the same, and is of great value to the University. Mr. Walker is a well-known and successful business man, and his gift is a most generous one. The fossils are of various kinds, and are of great scientific interest. They are now in the possession of the University, and will be used for the purpose of teaching and research.

Charles Lettlin had been robbed, but the

board of trustees of the University of Toronto, has signalled his intention to present a bill to the legislature for the accommodation is provided, his extremely valuable collection of fossils, containing many of the typical and important forms of the university could not have in any other place. Many are now represented in the Ottawa Museum. The bill for the collection is proved by the fact that it is being utilized properly by the paleontological department of the United States.

Relative of Mr. and Mrs. Weatherill of Unionville Celebrate Event.

The necessity for equipment of this kind is especially acute at the present time, when poor the university has been in that respect. And it is from a desire to remove this unhappy condition that the trustees have recently handed over his collections, and

It should scarcely be necessary to urge the government to help the university in meeting the requirements of the situation.

TO-DAY IN TORONTO.

Registration appeals, city hall, 11 a.m. Police commissioners, 2 p.m. Toronto Press Club, King Edward, 4.15 p.m.
