

DRASTIC MEASURE TO AVERT ACTUAL FAMINE IN COAL

Conditions Like War Time
But Restrictions Have
Not Saved Piles

Washington, D.C., Nov. 30.—The pinch of the coal shortage promised tonight to force the adoption of drastic measures to avert an actual famine. A vacation of one month by the soft coal miners has wrought on conditions like those prevailing during the war, in many sections, but war-time restrictions have not altogether checked the drain on the coal piles.

Elected Prince of Cough Cures

BUCKLEY'S WHITE BRONCHITIS MIXTURE has been unanimously declared by all victims of bronchitis, coughs, colds, hoarseness and bronchial asthma as the world's greatest remedy or any of the above ailments. Doctors stand amazed at its wonderful healing power. Long standing cases of 20 and 30 years of coughing have been cured by this great mixture. Not a syrup but a scientific mixture, discovered after medical science had failed, by a chemist who had labored night and day to compound a mixture that would give his daughter some relief, as bronchitis was choking her to death. It not only relieved her but produced an everlasting cure. Are you a victim of any of the above ailments? If so, get a bottle today, use it for five days, and if it does not prove to be the greatest of all remedies, take the bottle back and get your money. Is this fair? Can one do more than this to prove what a marvelous medicine it is? Price 60 cents, sold by all live dealers. Take no substitute, and fear the man who dares to say he has one just as good. Mailed for 15 cents.

D. J. Buckley, Mfg. Chemist, Toronto. Direct Import Co., 1 Union St.

cial tonight for an early production of bituminous coal in quantities sufficient to permit the maintenance of the present slim reserves, under the supervision of the railroad administration's central coal committee. The latest authentic figures show that last week's soft coal output did not reach fifty percent of normal production. This meant, officials explained, that local needs must be met from the supplies being distributed through the central committee, whose stocks aggregated about 2,000,000 tons when the miners quit work. No figures were available as to the exact amount now on hand.

While regional coal committees, acting under instructions from Washington, have been dealing out coal sparingly, further and more drastic restrictions have been agreed upon by the central committee. They will be put into effect whenever the regional committees are unable to meet the situation with local regulations. Details have not been made public, but it is known that the plan provides for a tremendous reduction of soft coal consumption.

SPEAKERS HERE FOR CONVENTION HEARD YESTERDAY

The Methodist ministers of the city, according to their monthly custom, interchanged pulpits for the morning services on Sunday. Rev. Thomas Marshall was in Exmouth street church; Rev. M. E. Condon in Centenary; Rev. Henry Penna in Queen square; Rev. George Dawson in Carmarthen street; Rev. Neil McLaughlin in Zion.

Rev. Dr. J. King, field secretary of the Methodist Young People's work in the Maritime provinces gave four addresses in the city and Fairville on Sunday. In the morning he preached in the Portland church, in the afternoon he addressed the Sunday school of the Exmouth street church, following which he spoke at an interdenominational meeting in Fairville and in the evening he was the preacher at the Carmarthen street church. Rev. E. McL. Smith, organizer for the forward movement, was the preacher in the Queen square church in the evening.

Rev. G. G. Rideout, of Toronto, who will be one of the speakers at the interdenominational forward movement convention today, occupied the pulpit of Centenary church in the evening.

Rev. W. McL. Matthews, of Millerton (N. B.), was the preacher at both services in Knox church. In the Main street Baptist church, Rev. R. S. Crisp preached at the morning service and Rev. H. C. Priest, of Toronto, at the evening service. Mr. Priest also is in the city as one of the speakers at the forward movement convention.

MILLIONS FOR RESEARCH

International appreciation of the value of scientific and industrial research is indicated by the fact that Japan has established a national laboratory for scientific and industrial research, with a fund of \$2,500,000 for use during the next ten years. Italy, too, is creating a national research council. A similar project is being discussed in France. In New Zealand a special industries committee of the house of representatives, impressed with the number of pressing scientific problems demanding solution in the country, has recommended the establishment of a board of science and industry for the development of national resources. The committee also recommends that the government should make special grants to each of the university colleges to provide fully qualified assistants to the professors of scientific subjects, including engineering, mining and medicine.

EVANGELIST FINDS SIN RAMPANT HERE

Dr. Rees Deals With Moral
Conditions in St. John as
They Have Appeared to
Him—Mission Closing.

The evangelistic campaign which is being conducted on the west side by Rev. Dr. Rees, will conclude this evening with the final address to be given in the City Hall. Dr. Rees addressed three meetings yesterday. At the afternoon one, for men only, he made some searching comments on the conditions in St. John. He spoke in the evening, first at the Methodist church, and later at the City Hall. All of the meetings were very largely attended.

Speaking at the meeting for men in the afternoon and on the subject: "Startling revelations in St. John," he used as his text, "Be sure your sin will find you." He said sin was a detective that never failed, the sins of the father might be revealed in the son and of the mother in the daughter, causing them to grieve that their children did as they had done. He took up the sins of St. John under three heads. The first was that of indifference to higher ideals of civic righteousness and Christian living. He criticised rather the atmosphere that permitted the sins to exist, than the sins that existed. He made plain statements of conditions in play houses and dance halls in the city, referring to some of the plays presented and speaking of the manner of conduct in cabarets.

His second head was that of gambling. He declared that, however good and worthy a cause might be for which money was to be raised, the cause never justified resorting to gambling methods. He said that at one of the fairs held in the city it was known that one person had lost \$80 and another \$20 through gambling. Dr. Rees maintained that "once a gambler always a gambler," was an inflexible rule and that in the end

all gamblers lost.

The third sin of which he spoke was that of immorality. He mentioned cases revealed at his own mission, of infidelity to marriage vows and quoted some notorious instances of immorality.

In the evening both Dr. Rees' addresses were on the subject, "Is it nothing to you?" Presenting to his hearers visions of possibilities, he asked them if it was nothing to them that the following were truths undeniable: that they were immoralists started on a journey that will never end; that in a world of sin they were disobedient to God; that because of sin they were without God and hope in the world; that Jesus came to seek and save; that the mission had been held and they had in it received another special opportunity. He closed with a graphic description of the release of Barabas rather than Christ.

The Young Peoples Society of the Charlotte church presented a beautiful bouquet of roses to Mrs. Rees at the close of the service. A male quartette sang most impressively "God Bless My Boy."

Hanson Denounces New Labor Party

Ole Hanson, former mayor of Seattle, who is in New York on a tour of the country in his fight against Bolshevism, denounced the so-called National Labor Party, organized at Chicago.

"I am glad," he said, "to hear that all the cranks in the country have come out in the open and have identified themselves with one organization. It is much better to have them united than to have them camouflaging and in different names. If we can ever get them all to vote on one side at one time they will realize how small their number really is."

"Calling the new organization the Labor party is, of course, just plain misrepresentation, as all parties such as this are composed of the I-Won't-Work's and the Will-Know's of the land. Our immigration service appears to be eligible for membership. I would suggest that the new party nominate Thomas F. Mooney for president and Frederic C. Howe for vice-president."

"This so-called Labor party is simply an organization making the usual demands—the impeachment of judges, the destruction of all who would enforce the

law, the liberation from prison of those who would overthrow the government, the general idea being to have the United States run for the benefit of those who hate it. They neither represent labor, nor will they receive labor's support for their programme."

MAMMOTH GENERATOR

London, Dec. 1.—A British factory is constructing for British use an electrical generator of 40,000 horse-power—a

record figure for a single unit. The generator, driven by a steam turbine, is to be installed in a power station near London. This generator is capable of supplying sufficient current to light simultaneously 3,000,000 eight-candle-power electric lights.

A horse driven by Rev. U. Myers, pastor of St. Matthew's Evangelical Lutheran Church of Catwissa, Penn., and still in good condition, is 47 years old.

This Xmas
give gloves,
and give the best—give "Dent's."
Kid or Cape,
Silk, Fabric
or Wool, there
is a well cut, well made
"Dent's" Glove—the best of
the kind, for every occasion.
And the name on the button
guarantees its excellence.

It's good taste and

GOOD YEAR
MADE IN CANADA

All-Weather Tires Are All-Wheel Tires

Years of research have failed to discover a better tread for any wheel—front or rear—than the Goodyear All-Weather Tread.

In and under the All-Weather Tread are those qualities which have made Goodyear Tires the most demanded tires in the world. Long-mileage, freedom from trouble, easy riding and easy steering, all these virtues are the outcome of years spent in constant tests and experiments. They reach their peak in the Goodyear Cord Tire.

But the Goodyear Cord Tire carries the All-Weather Tread. Because, in all our experimenting, we have found no improvements for the All-Weather Tread.

With Goodyear All-Weather Tread Tires on all five rims, no tire-change spoils the balanced appearance of your car.

Its sharp-edged blocks of tough rubber resist skidding; carry you around corners; pull you across snow-banked car tracks and out of the ruts; dig down through snow and mud and get a grip.

Front-wheel skids (the hardest to control) are prevented.

See a Goodyear Service Station Dealer about your tire equipment and his mileage-making service.
