LUMBER ADVANCED IN MONTH OF MARCH

Competition From Middle Europe Affects Forward Shipment.

Farnworth & Jardine's circular under date of Liverpool, April 1, says: "The volume of business in March showed improvement, and the general tone of the market was more satisfactory. Values were firm, with the tendency upwards. Imports moderate, in most instances exceeded by consumption. Stocks within reasonable limits. New Brunswick and Nova Scotia Spruce and Pine Dials, etc.—The import to the Mersey (which includes the Manchester Canal) all came by liner, and amounted to 1,800 standards. Lumber steady, and show 3,800 standards were shipped. Stock list, especially in Liverpool, the total between the two ports being 2,500 standards in comparison with 2,010 standards at the end of March, 1923. Business for forward shipment was disappointing, owing to shipper prices being high, in comparison with competitive varieties from Middle Europe. Values for their parcels firm, and advanced during the month. Pine Lumber—Seldom required for, and practically no stock. "Birch—Logs—About 15,000 cubic feet came to hand and met with good reception. Stocks are low, with a good demand. Values appreciated for fresh stock. Planks, etc.—Came forward in moderate quantities and were well received. There is no material change in values, which remain firm."

NEW YORK MARKET
