TWELVE PAGES—ONE CENT

COULD ARREST THE FLEEING GENERALS

la Sends Troops To Intercept Them

MAKING FOR BORDER

Government Sustain Severe Blow While Rebel Leader's Plans Work Out—Federal Give up Prisoners—Servant Girls Traited Into Their Army

(Canadian Press) Mexico, Dec. 2.—Confident that federal generals who evacuated Guahua City with their troops in search of refuge in the United States, thus beyond danger of being taken as prisoners by the rebels, General Alvaro Villa today sent more troops to intercept them.

Generals, led by General Salva-Medardo, whose desertion of Chihuahua and whose statements that he was a virtual breakdown of the dictatorial system, are headed for the border. It is thought that they will cross the river to Presidio, where they are expected to be met by the United States military forces, taken to Matamoros, where they will be held in a military camp. The river would follow as a matter of course, under a ruling of Secretary of War.

Generals are many subordinates, about 2,000 federal regulars, and more than 1,000 persons of wealthier class of Chihuahua, who are expected to follow them.

BIG FACTORY AT COLDBROOK

Canada Nail and Wire Company Probably Will Award Contract This Week Ready By Spring

Rear Admiral Sir Christopher Gossett, commanding the British Squadron in Mexican waters.

Tenders are being called for the construction of an immense factory at Coldbrook for the Canada Nail and Wire Company, Limited. It is expected that the contract will be awarded this week, and as soon as the successful tenderer is notified the work of construction will be commenced, and it is the intention of the company to have the works completed within three months and ready for operation early in the spring.

The factory will be located on the property of the Coldbrook Realty Company, where the new company has secured a site four acres in extent facing Robbsey avenue just beyond the railway station. The factory will have a frontage of 175 feet on Robbsey avenue, and a depth of fifty feet, and an ell running rearward at right angles, of the same dimensions. The main portion of the building will be one story in height with a two story section at the corner, where the wings intersect, the second story to be used for office purposes.

The foundations will be of piling surrounded by reinforced concrete, and the superstructure will be of brick construction. At the rear of the front portion and in the angle formed by the ell will be situated a brick boiler house, entirely separate from the main buildings. The machinery for the new plant has been ordered and the work of constructing the plant will be rushed along as the machinery arrives. It is seldom that a job of this magnitude is undertaken at this time of the year in St. John, but the new company is anxious to get to work, and it is not expected that the difficulties attending winter construction will be serious enough to retard the work.

The company has been organized for the manufacture of horsehoes nails and horsehoes calks, for both of which there is a big field in Canada, there being only one other concern in the Dominion making the latter article. The architect of the new plant, Gen. W. Wilson, is the architect of this modern plant, and the buildings will be erected under his supervision.

Twenty-Five Men Die in Fire In a Cheap Boston Hotel

In for Lodging, Trapped in Bunks on Fourth and Fifth Floors

THRILLING SCENES AS SOME OF THEM ESCAPE

Leap Across Alley to Next Building or Walk Shaky Plank High in Air—Hundred and Seventy-Eight Awake to Find Fire Cutting Off Escape by Stairways

(Canadian Press) Boston, Dec. 3.—Twenty-five men were killed in a fire which swept through the upper floors of the Arcadia Hotel, a cheap men's lodging house in the south end, early today. Others are missing and scores were taken to hospitals suffering from burns and injuries received in jumping from windows.

Nearly all the bodies were terribly burned and mutilated, making identification almost impossible. The victims were men in poor circumstances, who had resorted to the place for a night's lodging. Many of them were negroes. Caught in the crowded bunks on the top floor of the five story brick building, and in the small rooms on the fourth floor they were helpless. When they were aroused, the stairways were in flames and there was a mad rush for the fire escapes at the rear. Practically all the men were naked.

Over Shaky Plank High in Air Many were rescued by the firemen and police. Others escaped by walking a shaky plank stretched to an adjoining building or jumping across a fire foot to neighboring roofs. The property loss is estimated at \$25,000.

The Arcadia was located at the corner of Washington and Locust streets. The lower floors were occupied by stores. The fire apparently started—no one knows how—in a hallway close to the street floor. The flames swept up the roof. According to William Walsh, the night clerk, there were 175 lodgers in the building when the fire was seen by a passing newsboy.

After turning in alarm, he rushed into the building, awakening the men with his shouting. The top floor was one large room, filled with two cots in each of the small rooms. The men were nearly all asleep when the fire was seen. Many of them were negroes. Caught in the crowded bunks on the top floor of the five story brick building, and in the small rooms on the fourth floor they were helpless. When they were aroused, the stairways were in flames and there was a mad rush for the fire escapes at the rear. Practically all the men were naked.

A large squad of police, had great difficulty in forcing back the throng. It was nearly an hour after the firemen arrived, before they were able to enter the lodging house. The first man to ascend a smoking ladder shouted: "My God, boys, that place is littered with dead."

Medical Examiner George B. McGrath arrived soon afterwards and was joined by Dr. Timothy Leary, associate medical examiner. It was a gruesome sight as the bodies were removed in the early dawn. Onlookers crowded about the automobile hearse, which was turned away as the burned and mangled bodies were lowered one by one to the street, and placed in the wicker hearse. At daybreak the firemen were still searching the ruins.

BELIEVE BANDIT HAS MADE ESCAPE

(Canadian Press) Bingham, Utah, Dec. 2.—That the work of Sheriff Andrew Smith and his 200 deputies in the last three days has been for naught and that Ralph Lopez, a Mexican bandit and murderer, has not been in the Minute Mine here since Sunday, was the opinion generally expressed among the miners today. This, however, is not in accordance with the belief of Sheriff Smith, who said he probably would open the mine on Thursday morning, when he expected to find the body of Lopez.

Some evidence, however, is being given the theory advanced that Lopez had made his escape from the mine, and detectives have been put to work in Bingham to trace down possible clues.
