WILD TALK.
Influenza is almost, if not quite, epidemic—no the Grippy, serious kind, but the distressing flow from the eyes and nose that makes the sufferer miserable. "77" gives quick relief, and the quarter is well spent to rid one of such torment. Many persons keep well through the winter months, and then

TAKE COLD IN THE SPRING.
Vanity is largely to blame—the anxiety to wear the new Easter bonnet, or lighter wrap, or top coat. Sometimes the change is made because the winter garments look shabby in the dangerously bright, glaring sunshine—the person is exposed to the lingering, sharp, wintry air; result—a miserable cold that is hard to shake off.

cantata "Woman of Samaria" was the last number of the programme, the solos in it were taken by Miss Lora Murray, Mr. J. D. Taylor, Mr. E. L. MacDonald and Mr. J. R. Currie.
The Dor-Norricom company opened their engagement on Monday night with "Jase." They had a very good house indeed considering the state of the weather. Being "Jase" they gave a curtain raiser called "Barbara" written by J. C. K. Jerome. Judging from that author's book "Three Men in a Boat" you expected something very funny, but on the contrary you were treated to quite a pathetic man steeple on the scales. The scene was set exactly 83 miles. She was detained until the arrival of her husband, and was so impressed by his cleverness that she was anxious to be forgiven, and promised eternal fidelity when he came.

Well Protected.
It is all too common to misunderstand the true nature of a medicine, as anyone must confess, remembering the story of the nurse who awoke her patient in order to administer a sleeping potion.
A certain doctor one day met a neighbor, and inquired:
"Well, Jackson, how did your wife manage her new shower bath?"
"Oh, she had very good luck. Mrs. Smith told her how she managed with hers. She made an oil silk hood, with a big cap to it, that came down over her shoulders."
"She was an idiot for her pains," said the doctor, impatiently. "That's not the way."
"So my wife thought."
"And your wife did nothing of the kind, I hope?"
"Oh, no, no. My wife she used an embrello."

A Wooden-Legged General.
A general with a wooden leg remaining on active service sounds rather curious. It appears, however, not to be impracticable. Last autumn, during the manoeuvres in Catalonia, General Rendos was thrown from his horse and broke his leg. The limb had to be amputated, and it was feared that the general, who is one of the youngest and most talented of the staff would have to be placed on the retired list. A clever surgeon, however, had invented a leg which not only enables the gallant officer to walk without the aid of a stick, but to keep as good a seat on his horse as ever.

Ships Steered by Electricity.
A Frenchman has invented an apparatus that performs the work of a helmsman. When the vessel gets off the course for which the instrument is set, an electric current starts a motor and moves the rudder until the vessel returns to her proper course. After a two months' trial the apparatus is reported to have worked very successfully.

An Ugly Singer.
Yvette Guilbert, the new famous French comic singer, was a saleswoman in the Printemps, the Whiteley's of Paris. Before that she used to carry home work from her mother, who was a poor seamstress. She is ugly, shapeless, awkward, with pasty complexion, and long nose. Yet by her art she has made a fortune.

When Conan Doyle was about to undertake his lecture tour in the States, Robert Louis Stevenson wrote to him: "When you come to America call on me. My home is the second door on the left hand corner, leaving San Francisco."

Betrayed by Her Weight.
The spectacle of half a hundred hysterical women waiting in line to be weighed, guarded the while by a dozen gendarmes, excited the curiosity of the crowd about a railway station in Vienna a little while ago. A wealthy Austrian manufacturer, on arriving home one night, found a note from his wife saying that her love for him had grown cold and that she had left him for a description of his erring wife might not be accurate enough, and there was no time to lose, so he telegraphed to the Viennese Chief of Police: "Arrest woman who will arrive by the 10.15 express. Her exact weight is 83 kilos" (about 186 pounds). On receipt of this despatch the chief himself rushed to the railway station, and was much perplexed when he saw that most of the women who descended from the train were stoutly built. But he hesitated only a moment, and then decided to weigh each of them. One by one they stepped on to the luggage scales. The spectators were as ignorant as the women themselves of the motive for this singular proceeding, and the opinion prevailed among them that it must be the beginning of a series of new and disagreeable eccentricities on the part of their Chief of Police. At last one woman stepped on the scales and registered exactly 83 kilos. She was detained until the arrival of her husband, and was so impressed by his cleverness that she was anxious to be forgiven, and promised eternal fidelity when he came.
