TOLTON'S No. 1 Double Root Cutter

Points of Merit:

1. To change from pulping to slicing is but the work of a moment.
2. There are two separate wheels, one for pulping and the other for slicing.
3. The united force of both wheels is always used in doing the work in either capacity.
4. The hopper is between the wheels, and does not choke.

The Only Double Root Cutter Manufactured

Fitted with Roller Bearings, Steel Shafting and all that is latest and best in principal, material and construction.

HERE is a good watch for a small boy, and not a bad watch for a big one. It is a good reliable time-keeper and made to wear and stand hard usage.

How to Get It

We will mail this watch, carefully packed, postage prepaid, and guaranteed in good condition when it reaches you, if you will get only eight yearly subscriptions to **THE FARMING WORLD**. The subscription price is 60 cents a year, or two years for one dollar. The paper to one address for two years counts as two subscriptions. Thus, if you can get four of your neighbors to give you one dollar each, you secure the watch for nothing. Each subscriber will get the paper for two years; or, three at \$1.00 each and two at 60 cents with the watch. Any way in which you can make up the eight years' subscriptions, but they must all be

names of new readers of the paper. Any boy can earn a watch in a few hours.
