THE U. S. SEPARATOR SAVES TIME LABOR AND MAKES MONEY

When separating the milk, on account of its large capacity: Time saved is labor saved: By the arrangement of the gears and the use of ball bearings, etc., the required speed is obtained with less power than others.

When cleaning up afterwards, owing to the few parts to wash.

By getting more cream—it has proved in test after test that it is the cleanest skimmer on the market:

By improving the quality of the product, thereby commanding a higher price:

By wearing longer, on account of its more substantial and simple make-up, thus lessening repair bills, etc.

If interested, write for catalogues containing letters from prominent users, dairying authorities, experiment stations, etc., confirming the above statements.
