

## If You are Deaf--Read This.

The Accidental Discovery of an Electrical Engineer, which Restored His Lost Hearing.

That "Truth is stranger than fiction" is most forcibly illustrated in the case of Mr. Geo. P. Way, for many years the electrical engineer of the Detroit Y. M. C. A., in the accidental discovery he made of a scientific principle, through the application of which his lost hearing was completely restored.

GEO. P. WAY, inventor.

For 25 years Mr. Way was a deaf man, unable to hear his wife's voice across the table, unable to enjoy an active part in social life. For him, as for every deaf person, life was a gloomy, individual matter. He was so deaf he could scarcely hear the roar of his engines and dynamos. For ten years he carried an ear trumpet, and had tried every device known; had almost constantly been under medical treatment in the vain effort to get back his hearing. To-day he hears perfectly, yet when he removes two tiny devices from his ears, he is quite as badly off as before—he is again deaf. The story of his discovery, which restored his hearing, is remarkable.

As Mr. Way tells it, he was at his post in the dynamo-room one day, and as the buzzing in his ears bothered him more than usual, he placed a curiously-shaped tuft of waste in his right ear. Immediately in the midst of the silence that is the misery of one shut off from the sounds of the busy world, there came a crashing sound, and Mr. Way bounded across the room terror-stricken. Unconsciously he pulled the tuft of waste from his ear. Instantly he re-

turned to the silence that had enveloped him for years. The sound of the machinery came to him as far away. Then he realized the truth—he had found a scientific principle which would give him back his hearing. For five years he experimented constantly to put his accidental discovery to practical use. He studied the construction of the human ear from every standpoint. At last complete success crowned his efforts. The Way Ear Drum was the result, and it restored his hearing. Others heard of the marvel and he was overwhelmed with requests for the little device.

Wealthy business men in Detroit, who had known Mr. Way for years, and the marvelous results which his invention had brought, gave him full financial backing, to extend the blessings which his wonderful ear drums bring to those who suffer from impaired hearing and deafness. Thousands of the drums have been sold in every part of the world, as one pair of the drums in any locality produces many other sales. **Nine persons out of every ten who have used the Way Ear Drums have benefited by them.**

The Way Ear Drum is a thoroughly scientific device. It is of peculiar, sensitive material, shaped to exactly fit the opening to the inner ear. It is easily and quickly placed and removed; cannot collapse; is entirely unfelt and unseen; is very durable, and it **does bring back the hearing.** Don't judge the Way Ear Drum by any other ear device. It is distinctively different in principle. If you are deaf or "hard of hearing," if your hearing is becoming dull, if you have "noises in the head," write a plain letter telling your troubles to Mr. Way. He will be honest and will tell you whether the Way Ear Drum will help you. It costs you nothing to find out. Write personally to-day to Geo. P. Way, 521 Majestic Bldg., Detroit, Mich., U. S. A.

### GOSSIP.

A carriage stallion is advertised for sale by E. W. Brooks, Glen Ross, Hastings County, Ontario.

The post-office address of Mr. A. F. O'Neil, given in footlines to the portrait of his imported Clydesdale stallion, Celtic Prince, appearing in "The Farmer's Advocate" for April 25th, should read Maple Grove, instead of Maple Lodge.

Mr. Jas. Elliot, of Oxford Centre, Ont., writes that he sails May 3rd for Scotland for another importation of Clydesdale fillies, which will be sold by auction at Guelph about June 20th, further notice of which will appear in the advertising columns of "The Farmer's Advocate," when the exact date of sale is decided upon.

A special meeting of the members of the Clydesdale Association of Canada is called for consideration of the proposed amendment to the rules regarding the registration of imported stallions and fillies. The meeting, as will be seen from the advertisement on another page of this issue, is to be held at the King Edward Hotel, Toronto, on May 23rd, at 2 o'clock. See the advertisement, and be governed accordingly.

Breeders and owners of Clydesdale stallions or mares, eligible to registry in the Canadian National Records, should read the advertisement in this paper, calling attention to the importance of attending to the registering of their stock promptly. Information is given in the advertisement as to how to proceed in order to secure the necessary entry forms and the rules governing registration, the fees required, etc.

The imported Clydesdale stallion, King Thomas (12625), whose picture appears on another page in this issue, was recently imported by Mr. T. J. Berry of Hensall, Huron Co., Ont., who owns him and will stand him for service this season at his own stables at two dollars at time of service and fifteen dollars first of January, 1908, if mare proves in foal. King Thomas is a dark brown, rising 5 years, stands seventeen hands high, weighs close to a ton, has the best of feet, clean flat bone, silky hair, capital action and is thoroughly sound. He was sired by Prince Thomas, by Sir Thomas, by Prince of Wales (873), and his dam, Mary Garden (9665), was a champion mare sired by McCamon that won at the Centenary Show at Edinburgh, and was sold to the Aberdeenshire Horse Breeding Co. for £850 (\$4,250). Mr. Berry claims to have brought more than one hundred horses over the sea in his time, including many good ones, but reckons King Thomas the best of the lot.

### ANNOUNCEMENT.

Fairview Farm, Woodville, Ont., is to be henceforth carried on by Messrs. J. & D. J. Campbell. The senior partner, wishing to obtain more freedom from close attention to the management, has arranged with his nephew to relieve him. Mr. Donald J. Campbell has from early childhood been on the farm, and for many years been an active helper. He will therefore be in close touch with the business, and it is the intention that breeding of Shorthorns, Shropshires and other lines shall be carried on as in past years.

### TRADE TOPIC.

CHATHAM KITCHEN CABINET.—Invention so far has done rather more for the farmer than for his wife, though every affectionate husband is prepared to welcome conveniences to relieve the labor of the women on the farm. In this issue will be found an attractive proposition from that well-known firm, The Manson Campbell Co., Chatham, Ont., who offer to sell a useful kitchen cabinet on a liberal time-payment plan. Look up their advertisement, which shows a cut of this excellent piece of furniture, and write at once for particulars, mentioning this paper.

## THE PEERLESS WOVEN WIRE FENCE

The regular styles of Peerless Fence are made of heavily galvanized all No. 9 hard drawn steel wire because this grade has been found to be the very best for the purpose. It is not too hard nor too soft, but strong and elastic. An extremely hard wire breaks easily at a sharp bend, but very soft wire will stretch and has no elasticity. The Peerless No. 9 is neither soft or brittle, but has the strong elastic qualities a good fence requires.

You do not want a fence to bag or sag at the center. Peerless Fence is strong and springy. The upright wires are stiff and are held in position by the Peerless Lock. This

### ALL NO 9 WIRE

lock holds securely without damaging the wires, and while it holds the cross and horizontal wires firmly together, the fence is elastic and will readily conform to any land surface. Peerless Fence offers the most complete resistance to all kinds of stock and it is impossible for them to get over, under or through it.

Write for our printed matter, telling how to build fences and make concrete posts.

**The Banwell Hoxie Wire Fence Co. Ltd.**  
Dept. B, Hamilton, Ontario, Canada.

The Fairview herd of Holstein-Friesian cattle, property of E. H. Dollar, of Heuvelton, N. Y., seven miles from Prescott, Ont., is advertised in this paper. This herd is the home of the famous cow, Pontiac Rag Apple, that sold recently for \$8,000. Young bulls and heifers, by the sire of this cow, are offered for sale, and inspection of the herd is invited.

The excellent engraving of a group of Lincoln yearling ewes, appearing on another page in this issue of "The Farmer's Advocate," the property of Mr. A. D. McGugan, Glenora Stock Farm, Rodney, Ont., represents a typical bunch of that heavy-fleeced, strong-constituted breed of sheep, so much in demand at the present time, and selling for such high prices in England. A descriptive sketch of this fine flock appeared in the "Gossip" columns of our April 25th issue.

## SUNSHINE FURNACE

### UNBREAKABLE FIRE-POT

The lower portion of a fire-pot is usually nearly or partly filled with dead ashes, leaving the live, red-hot coals in the upper part. The result is that the upper portion expands much more than the lower.

This uneven expansion causes a strain too great for a one-piece fire-pot to stand. Sooner or later it will split, allowing precious heat and sickening gases to escape.

But the fire-pot of the Sunshine is constructed to meet this condition. It is in two sections. The upper half expands, as much as necessary, independently of the lower. When cool, it contracts back to its original size, fitting to the lower half perfectly.

And this strong, unbreakable, gas and heat-tight, two-piece fire-pot is just one of the many superior features of the Sunshine.

If your local dealer does not handle the "Sunshine," write direct to us for **FREE BOOKLET.**
