

**FROST & WOOD
No. 8
MOWER**

**HAY-MAKERS
THEY WORK WELL
TOGETHER**

An ideal combination for getting in your crop of grass. Our No. 8 Mower with its strong, substantial build, its accurate, clean-cutting power and ease of operation, is a real money-saver and profit-earner for thousands of farmers at every point in the Dominion. It is strong, durable, needs few repairs. It works day in and day out, proving the stalwart honesty and mechanical excellence put into every gear and wheel, knife and shaft, cutter-bar and pitman.

But there's the other tool—can't get along without that—the Tiger Hay-Rake.

It's all steel, except tooth-rail and shafts, which makes it proof against hard work, rain and exposure. A Tiger Rake is exceptionally durable. It does such clean work, too. The spring teeth have just enough elasticity, and are curved so as to pick up grass easily and evenly. It's an easy rake to handle for horse and driver. It can be dumped by foot or hand. The fall of the teeth after dumping is eased by a strong spring that prevents much of that disagreeable jar so evident in cheap rakes. We can't tell you here the scores of good points about these hay-makers. Send for our catalog 153 and special "Hay-Making Folder." Both books are free, and answer your questions. Ask our local agent to show you our farm implements. He'll gladly do it.

**HITCH YOUR HORSES TO
The "Bissell"**

The horses hitch close to the work, giving the "Bissell" light draft. You sit well back, the seat being balanced so that it removes all neck weight. The dust-proof ball bearings still further decrease the draft. The "Bissell" is by far the easiest on the horses. It pulverizes the soil the best, too. The shape of the plates enables them to easily enter the toughest soil. They turn clean furrows. The cleaners draw to the plates and meet them chisel fashion. They cannot be forced away from the plates, but cut right through the dirt, fiber and grass, and keep the plates free. The "Bissell" is solidly braced, and cannot be beaten for rigidity and strength. It takes skill and experience to build a harrow like the "Bissell." It has taken us about a score of years to bring it to its present perfection. Other harrows may look like the "Bissell," but a field test will prove it twice as good an investment. We ask you to make the test. Ask your local dealer to show you the "Bissell," or write Dept. W. for catalogue.

A Record Breaker for You

Cut this out and mail to us, and we will send you our "SPECIAL ADVERTISING OFFER" for one month only.

**"LONDON" Gas or Gasoline
Engines and Outfits**
1/2 TO 5 HORSE-POWER.

Satisfaction guaranteed.

Scott Machine Co., Limited, London, Canada

THIS IS THE SHEET METAL AGE.

To make a factory, warehouse, barn, shed or outbuilding of any description, wind, water, snow, fire and lightning proof cover it with

Galt Corrugated Sheets

which are accurately pressed from the best and most durable British Steel it is possible to procure.

All corrugations are straight and true, assuring an accurate fit at both side and end laps without waste. Special hip and ridge covers make tight, neat joints at these points.

Where warmth is not important "Galt" Corrugated Sheets save three-fourths of the wood sheeting as well as considerable labor, and will give good service for a life time of at least fifty years.

It costs no more for a "Galt" Corrugated Sheet Steel Building than for a wood one. Which do you think is the better investment? Galvanized or painted material always in stock. Complete information in catalog "3-B."
