

Order Your Binder Twine Early

We are selling the Diamond  Golden Manila binder twine. It is made specially for us and we can confidently recommend it. It contains about 50 per cent, pure Manila and measures 550 feet to the pound. It is smoothly woven and can be used with perfect satisfaction in every pattern of knotter.

Our prices are 11½c. per pound at Winnipeg; 12c. at Brandon; 12½c. at Regina and 12½c. at Calgary. To these prices must be added the local freight rates from any one of these points to the point to which you want your twine delivered.

If, however, twine is bought in car lots it will cost, laid down at your station, just about the same as the price quoted at the point of distribution nearest to you. This of course is the most economical way of buying and it would pay you to have your neighbors unite with you in ordering. And even if you have not a full car send the orders to us, for it is more than likely that we have other orders for your station that will make up the car lot, and if we have not we will see that you get your twine in the cheapest possible way.

Send your order in at the earliest possible date, as it will assist us in arranging car lots. There is no risk in ordering early from us for we give the following guarantee:—Should your crops be destroyed by hail or excessive rain, or should the twine be unsatisfactory for any reason, you are at liberty to return it to us at our expense and we will refund your money promptly

Ingle Nook Chats

INGLE NOOK HELPS THE HOUSE KEEPER.

Dear Dame Durden:—I have been an interested reader of the Ingle Nook for a long time and find many helpful things there about house-keeping, which I would not like to do without now. But I have never written before to thank you for your kindly advice. Seeing that a "Mother of Six" would like a recipe for lemon cheese I thought I might send mine, for it is a good one. I use it as a filling for tarts, layer cake, and to put between cookies, etc.

Lemon Cheese.—Beat to a smoothness ¼ lb. butter and 1 lb. white sugar, then add 6 eggs (leaving out the whites of two), grated rind and juice of 3 lemons. Put all in a double boiler and stir. Let it simmer until it assumes the consistency of honey; then pour into tumblers. This will keep for a long time like jelly.

May I come again?

GOLD ELSIE

BEEF FOR SUMMER USE.

Dear Dame Durden:—I have long tried to steal a little warmth from your Ingle Nook and at last I have determined to come closer in. I will not be surprised if you hustle me out of your corner, for I admit that it is too sacred a place for a rough bachelor, but first I implore you to help me out of a difficulty. Friend "Pieace" was anxious about outside appearances, but I wish to provide for the inner man. I am likely to have some beef left over in the spring. Will you please tell me of some nice way to "fix" it for summer use? I thought of salting and smoking it, but would not that make the meat very dry and hard? Is there any way to cook it and put it down? I am very grateful to you for your hints on fixing up canned goods in your issue of February 27th. My attempts at making bread do not turn out on top every time. I hit upon a plan which looked promising during the very cold weather. Before going to bed one night I heated a pail of water on the stove. Then I placed the pail in a wooden box and put my bread pan over the hot water. I packed the pail tightly in the box with towels and newspapers and covered the whole with a thick pea jacket. Next morning the dough was quite warm and had risen beautifully. I put the pail of water and bread pan on the stove to keep warm and went out to do my chores. (Now don't laugh at a poor bachelor.) When I came in the shack I was greeted with a very strong smell of yeast, and there was my dough almost boiling and completely spoilt. Since then I have made a shift with soda bread and I am saving my yeast for the warm spring days.

YORKSHIREMAN

(Your plan of coming boldly into the Ingle Nook to get warm is much better than trying to steal our coals. The Ingle Nook hopes never to be too perfect a spot to be useful to men, women or children. That is the reason for its existence. To help with your difficulty in regard to the beef, you will find full directions for curing and corning beef in the FARMER'S ADVOCATE for Jan. 24th, 1906, on page 140. In addition, here is a method of pickling beef:—For about 14 pounds of beef take 6 lbs. salt, 2 lbs. fine sugar, 3 ounces saltpetre and 3 gallons water. Boil gently as long as any scum rises, which must be carefully removed. When quite cold pour over the meat completely covering it and leave in the brine for 12 or 15 days.

Dried beef is very good and can be prepared by taking the finest lean pieces and treating them with a mixture of one pint salt, one teaspoon saltpetre and a quarter of a pound of brown sugar to every twenty pounds of meat. Divide the meat into four or five pound pieces and use a third of the mixture on three successive days, rubbing it well into the meat. Then cover each piece with factory cotton, sewing the cover on, and hang up in

This Washer Must Pay for Itself

A MAN tried to sell me a horse, once. He said it was a fine horse and had nothing the matter with it. I wanted a fine horse. But, I didn't know anything about horses much. And, I didn't know the man very well, either.

So I told him I wanted to try the horse for a month. He said "all right, but pay me first, and I'll give back your money if the horse isn't all right."

Well, I didn't like that. I was afraid the horse wasn't "all right" and that I might have to whistle for my money if I once parted with it. So I didn't buy the horse although I wanted it badly. Now this set me thinking.

You see I make Washing Machines—the "1900 Junior" Washer. And, as I said to myself, lots of people may think about my Washing Machines as I thought about the horse, and about the man who owned it. But, I'd never know, because they wouldn't write and tell me. You see I sell all my Washing Machines by mail. (I sold 200,000 that way already—two million dollars' worth.)

So, thought I, it's only fair enough to let people try my Washing Machines for a month, before they pay for them, just as I wanted to try the horse.

Now I know what our "1900 Junior" Washer will do. I know it will wash clothes, without wearing them, in less than half the time they can be washed by hand, or by any other machine.

When I say half the time, I mean half—not a little quicker, but twice as quick.

I know it will wash a tub full of very dirty clothes in Six minutes. I know no other machine ever invented can do that, in less than 12 minutes, without wearing out the clothes.

I'm in the Washing Machine business for Keeps. That's why I know these things so surely. Because I have to know them, and there isn't a Washing Machine made that I haven't seen and studied.

Our "1900 Junior" Washer does the work so easy that a child can run it almost as well as a strong woman. And, it don't wear the clothes, nor fray the edges, nor break buttons, the way all other washing machines do.

It just drives soapy water clear through the threads of the clothes like a Force Pump might.

If people only knew how much hard work the "1900 Junior" Washer saves every week, for 10 years—and how much longer their clothes would wear, they would fall over each other trying to buy it.

So said I, to myself, I'll just do with my "1900 Junior" Washer what I wanted the man to do with the horse. Only, I won't wait for people to ask me. I'll offer to do it first, and I'll "make good" the offer every time. That's how I sold 200,000 Washers.

I will send any reliable person, a "1900 Junior" Washer on a full month's free trial! I'll pay the freight out of my own pocket. And if you don't want the machine after you've used it a month, I'll take it back and pay the freight that way, too. Surely that's fair enough, isn't it?

Doesn't it prove that the "1900 Junior" Washer must be all that I say it is? How could I make anything out of such a deal as that, if I hadn't the finest thing that ever happened, for Washing Clothes—the quickest, easiest and handsomest Washer on Earth. It will save its

whole cost in a few months, in Wear and Tear on clothes alone. And then it will save 50 cents to 75 cents a week over that in Washerwoman's wages. If you keep the machine, after a month's trial, I'll let you pay for it out of what it saves you. If it saves you 60 cents a week, send me 50 cents a week till paid for. I'll take that cheerfully, and I'll wait for my money until the machine itself earns the balance.

Now, don't be suspicious. I'm making you a simple, straightforward offer, that you can't risk anything on anyhow. I'm willing to do all the risking myself! Drop me a line today and let me send you a book about the "1900 Junior" Washer that washes clothes in 6 minutes. Or, I'll send the machine on to you, a reliable person, if you say so, and take all the risk myself. Address me this way—A.W.B. Bach, Manager "1900" Washer Co., 355 Yonge St., Toronto, Ont. Don't delay, write me a post card now, while you think of it.
