1886. CHRISTMAS GREETING. 1886.

**DARVILL'S**

—NEW—  
**BRICK MACHINE**

Makes a Perfect Brick, equal to  
a repressed brick.  
Will Mold in either Oil, Water  
or Sand.

The Molds are connected to-  
gether, forming a revolving chain  
of molds which pass through a  
trough of water or oil.

**3 MEN LESS**

Are required to run this machine than a common  
stock machine.

No man is required for the molds or to strike off, while the bricks are delivered to  
any part of the yard on an endless belt, thus requiring no wheeling out.

**3 SIZES.**

No. 1 has a capacity of 8,000; No. 2, 16,000, and No. 3, 20,000  
bricks per day.

It is driven by either horse or steam power, and is unequalled for  
light running and quality of brick.

P.S.—As the number of machines made this season will be limited,  
intending purchasers should order early.

ALL MACHINES WARRANTED.
