FOLDERANT POLITICIANS.

The Times on Tuesday evening had a near converge of the part of the description of the part very formidable in the misunderstanding with France respecting the agreement between Great Britain and the Congo Free State. It speaks of that agreement as "a very natural and harmless rectification o frontiers." In explaining the situation it is not likely that they ever will. We have liberty of opinion and liberty of speech

tried to have their own way by preventing the free expression of opinion. But they obtained their purpose, and it is not likely that they ever will. We have not accomplished their purpose, and it is not likely that they ever will. We have liberty of opinion and liberty of speech, are the loudest advocates of liberty of opinion and we have not accomplished their purpose, and it is not likely that they ever will. We have liberty of opinion and liberty of speech, are sometimes in practice the most of a proposition. It so happens that at the recent westminster meeting Mr. Davided Mr. Brown when the latter said who have liberty of opinion and liberty of speech, are sometimes in practice the most arbitrary and the most unreasonable of a promptly condemned by the great majority of the people, and any means that moldes are somewhat peculiar. He first wither the promptly condemned by the great majority of the people, and any means that might be taken to hurl it from power would be considered justifiable. Yet this is precisely the kind of tyranny that the Vancouver howlers at least night's meeting he volunteered the statement that it had been read in the House, and after the promptly condemned by the great majority of the people, and any means that meeting would be the statement that it had been read in the House, and after the promptly condemned by the great majority of the specific denied at Westminster that it had been read in the House, and after the statement that it had been read in the House, and after the promptly condemned by the great majority of the wind it from the printed return, then he in effect denied at Westminster that it had been read. The house, and after the promptly condemned by the great majority of the wind it from the printed return, then he in the course of cutting stone contractor and the loss. He also concept was a majority of them, if they once realized the majority of them, if they once realized the mature of their own act, would be thoroughly ashamed of themselves and would be the mature of ny on their fellow citizens.

But this kind of tyranny is abortive. The howlers can disturb a public meeting and prevent a public speaker from being heard, but they cannot prevent those who disapprove of them and their methods voting in the way they think best. Hap pily our laws make it impossible for the mob that attempts to suppress freedom of speech to take a single step towards interfering with the freedom of election. The elector whom they will not permit to listen to a speaker at a public meeting in peace, can as yet mark his ballot in perfect security. This would not be the case long if the violence which makes public meeting scenes of turbulent intolerance and disorder were permitted to produce its natural and its logical results. It is the interest and the duty of all law abiding and freedom-loving citizens to nip this kind of tyranny in the bud. Its tendency is to grow until it be-

Erastus Wiman Sentenced to Five and a Half Years in the Penitentiary.

"I could have destroyed these vouchers, every one of them." He rapidly sketched on a sheet of paper the interior of the Dun's Wiman office. "There was Mr. Dun's desk; he rarely occupied it. Here was my desk, and there was the cashier's desk. I could have destroyed any vouchers. Is it likely that if I forged or did any wrong that I should have let the evidence remain? And the idea of such forgeries! If I had wanted to forge I could have forged for half a milling as easily as falling off a log. At the ion as easily as falling off a log. At the time that cheque was made I had indirectly \$200,000 of the agency's money standing at my order."

For some time Mr. Wiman reviewed his

work in building up the Dun-Wiman agency, saying :

"I had never less than twenty libel suits on hand at any one time. There was a great deal of delicate work about adjusting some of them. It was necessary to use money sometimes and not to do it in too marked a way because of the principle of the thing. Think of the work I did to prevent hostile legislation that threatened the Dun-Wiman business. Seven states at one time were trying to legislate us out of existence. Once I spent a month at Harrisburg and worked night and day with the legislators. At a critical moment I needed to influence the smators. I sent telegrams differently worded to all my agents in the state. I ordered them to get those telegrams signed by the biggest men in their localities and repeat them back to the senators. That confession and my letters to Dun generally are difficult and delicate to treat. It is hard for one not acquainted with the circumstances to understand the to treat. It is hard for one not acquainted with the circumstances to understand the matter. Mr. Dun had come to look upon himself as almost a little god; he liked to be addressed in that manner. When I was forced out of the firm and these matters were discovered, as they call it, Macfarland talked to me in a way that induced me to write as I did. He urged me to turn over to the firm the property which I had in my write as I did. He urged me to turn over to the firm the property which I had in my wife's name: it could not be in my name because I was not a citizen of this country. I was told that my wife, on turning over all she possessed, would be looked after by Dun; that she would get \$12,000 or \$15,000 a year for life. Macfarland said to me, 'Wiman, there are lots of irregularities here; now you turn over that property and get out. Spend the rest property and get out. Spend the rest of your life quietly. With considerable strength and energy Mr. Wiman made the point that if he is guilty of forgery now he was guilty a year ago, and that those who accuse him, knowing a year ago what they know now, were compounders of felony for one year. The hope of his friends was, he said, that it would not be thought necessary to make him ears. not be thought necessary to make him asso-clate with criminals in prison for a long time.
