Tulare Lake in California is rapidly drying weeks could eat nothing, and was

up. A few years ago it was 38 miles long by growing weaker every day. I tried 21 miles wide, but now it is only 15 by 8 Davis' Quinine, Iron and Wine, and miles wide, but now it is only 10 by 8 miles in area. This result is attributed to the destruction of the forests on the mountains, and more especially the trapping of the water courses by which the lake is fed, and the boring of artesian wells. It is impossible Yours,
