KEEPING DOWN COST

THE WEBSTER FEED WATER HEATER
IS THE GREAT SAVER OF STEAM AND FUEL

First—It uses only just enough of the exhaust to bring the feed-water to the highest point.

Second—It heats it by DIRECT CONTACT with the steam.

Third—It prevents waste from "back pressure" on the engine.

These and other points of advantage are to-day reducing the cost of production for hundreds of manufacturers so greatly as to make it very hard indeed for others with less efficient steam appliances to keep pace with them.
