

During the hot Summer months when children get peevish and restless and suffer frequently from stomach disturbances,

Dike's Digestive Glycerophosphates

is especially serviceable.

This combination of active digestants along with Glycerophosphates, is the ideal hot weather tonic both for very young children and adults.

The digestants in Dike's Digestive Glycerophosphates will digest any form of food, fatty, starch or proteid, and thorough assimilation of the glycerophosphates is assured.

Give the babies Dike's Digestive Glycerophosphates and you will be more than pleased with results.

Sample and literature on request.
