THE REV A. MELVILLE,

Sometime before he died, left a number of his volumes of Sermons in the hands of mon with whom he weasequainted with a view to have them sold. Mr. Lielville, though correct and pacise in the disposal of nearly all his affects, neglected to give information to he Executors in relation to his volumes of Sermons that he left in different places of the country. A REPRESENTATIVE & CHAMPION OF AMERICANART TASTE

Prospectus for 1875-Eighth Year.

ALDINE. THE

The ART JOURNAL of America. ISSUED MONTHLY.

"A Magnificent Conception Wond rfully carried out."

The necessity of a popular medium or the representation of the productions of our great artists. As always been recognized, and many attempts have been made to meet the want. The successive followed swhich so invariably followed each attempt in this country to establish an art ournal, did not prove the indifference of the people of America to the claims of high art. So soon as a proper appreciation of the want and an ability to meet it were shown; the public at once railied with earthusiasm to its support, and the result was a great artistic and commercial triumph—THE ALDINE.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary periodicals. It is an ologan, miscellancy of pure, 1ght and graceful literature? And a collection of pictures, the rarest specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and beauty of THE ALDINE will be most appreciated after it is bound up at the close of the year. While other publications may claim superior cheapness, as compared with rivals of a similar class, THE ALDINE is a unique and original conception—alone and anapproached—absolutely withous competition in price or character. The possessor of a complete volume can not duplicate the quantity of fine paper and engravings in any other shape or number of volumes for ten times six ext; and then.

tion in price or character. The possessor of a complete volume can not duplicate the quantity of ine paper and engrovings in any other snape or number of volumes for ten times, its cost; and then, there is the chromo, besides!

The national feature of THE ALDINE must be taken in no narrow sense. True art is cosmopoit can. While THE ALDINE is a strictly American institution, it does not confine at self on iret, to the reproduction of native art. Its mission is to entity to a broad and appreciative art taste, one that will discriminate only on grounds of intrinsic merit. Thus, while placing before the patrons of THE ALDINE, as a leading characterist c, the productions of the most noted American artists, attention will always be given to specimens from foreign masters, giving subscribers all the pleasure and instruction obtainable from home or foreign sources.

The artistic il astration of Alerican severy, original with IHE ALDINE, is an important feature, and its magnificent plates are of a size more appropriate to the satisfactory treatment of details than can be afforded by any inferior page. The indicious intersyersion of landscape, marine, figure, and animal subjects, sustain an unabted interest, impossible where the scope of the work confines the artist too closely to a single style of subject. The interature of IHE ALDINE is a light and graceful accompaniment, worthy of the artistic features, with only such technica, disquisitions as do not interfore with the popular interest of the work PREMIUM FOR 1875.

Exercise the production of the columne can or capper of the columne octavo pages of readingent and them, there is no common of the cosmoporal and them, then the only interest in most offers, with free states of the most noted American artists, attention will always be given to specimens from foreign masters, giving subscribers all the pleasure and instruction obtained from home or foreign sources for the day, from the pens of the above named, and many other regarded with a subject source of the day of the
