BROWN-SEQUARD'S ELIXIR

The Rejuverating Remedy Successfully Træd on Several Subjects.

CINCINSATI, O., August 9.—Dr. Robert Longfelow, professor of dermatology in the Colnectionati College of Medicine and Surgery, condicted a series of experiments yesterday with Brown-Sequard's elixir. Tests were made on a dezen subjects. The first two petients were Thomas Alburn, an Englishman, 5 years old. and Fielden Weir, a colored exslave, aged 70. The latter was bent and crippled with rheumatism and Alburn had been lamed by erysipelas. The liquid was injected into the arms and legs. When both subjects returned in the evening they could walk with case. The exhilarating effect on the Englishman was great. He walked a dozen squares and declared all pain and stiffness had left his limbs. Both experiments were pronounced eminently successful. Dr. Brainard, of Cleveland, has also experienced successful results with the elixir in several cases where it was administered unknown to the sub-

Dr. Longfellow reports that in all the cases to whom he administered the fluid yesterday the effects were similar except one. That was in the case of a man 35 years' old, in full health and in no need of a tonic. He experienced slight sickness. He reports further that the old colored man whose rheumatism was so completely cured last night says this

the Aged. The experiments were made upon two inmates, aged 59 and 71 years, The elixir was hypodermically injected twice a week, the patient being ignorant of its nature. The effect has been quite satisfactory and the vitality of the men seems to have improved considerably. Dr. Berger thinks a mixture of opium, cocaine and brandy will have the same effect as the elixir. He will try it on two other inmates and make comparisons.

A MONSTROUS COMBINE

To Corner all the Sugar in the World.

SAN FRANCISCO, Cal., August 9.-Reports are in circulation that the Sugar trust has almost completed negotiations with an English-German syndicate to get the sugar markets of the world under one supreme control. The plan contemplates bonding for a short time all the principal plantations of Unba, the Phillipine islands, Java and Mauritius, which would place the main source of the raw supply under the control of the syndicate. The surplus stocks of unrefined beet sugars of Germany and France are to be accumulated in store for shipment to America at the proper time. The supply of raw cane sugar will be curtailed by at least 3.5. All surplus refined beet augar will be shipped to America. This would create a deficiency in Germany, France and England, while the American supply would still be short. It is estimated that the Sugar trust and the Angle-German partners would at least pay 25 per cent. upon a capital of \$100,000,000, which, according to the rumor, will be neces-sary to accomplish the gigantic schems.

BLOWN UP BY NATURAL GAS.

Two Killed and Many Wounded by a Pittsburg, Pa., Explosion.

PITTSBURG, August 9 .- There was a terrific explosion on the south side shortly after 6 o'clock this evening. Booth & Flynn were testing a thirty-inch natural gas main which they had laid for the Monongahela Natural Gas company. Their workmen were testing it before turning on the natural gas. By means of compressed air they ran the pressure up to 75 pounds per square inch, when the dead cap on the end of the pipe blew out. scattering debris in every direction. Several hundred workmen employed in the iron mills were returning home and a number had stopped to watch the experiment. They were struck by the debris and flying missiles as though a bomb had exploded. The pipe was braced with heavy timbers, and these hurled into the crowd with terrific force. The workmen and spectators were thrown down, and one who was killed was hurled against a brick house and his neck broken. A general stampeds ensued, and a scene of the wildest excitement followed. The ories of the injured could be heard several squares.

The following were killed: John Miller, single, aged 23; John O'Connor, single, aged about 25. The following were seriously in jured: John Grenier, married, terribly out and bruised and injured internally, will die; Henry Reich, a boy, skull fractured and in-jured internally, will die; Jenh Braney, in-ternally injured and head out, serious Wm. Green, hadly out and bruised, thought to have received internal injuries; James Hendrick, of St. Louis, both legs broken. Nine ethers were struck by flying debris and cut and bruised, but none of them seriously

The approaching marriage of the Kalser's sister to the Crown Prince of Greece vastly increases the difficulty under which Germany rests, as in the event of the Pewers decision to prevent Greece from interfering in the squabble between the Turks and the Oretars the martial alliance will force Germany into the background. The identical notes of Russia and France on the subject both express discontent of Lord Salisbury's Government, while Austria's eyes are turned toward Russia with the expectation of some hostile demenstration from that quarter.

Mr. Michael Davitt, speaking at a lecture delivered in the Rotunda Dublin on July 13, by Mr. Henry George, said in reference to the new agrarian movement, that what Mr. Parnell proposed to do was to create a trades' union combination in connection with agriculture for the protection of those who tilled the soil, until there was a final and just settlement of the Irish land question. The programme of the new combination would, he hoped, leave open the question of what the final settlement of the Irish agrarian problem was to be. Any final settlement must be made in a Parliament elected the trish negative. by the Irish people?

A London despatch says: There is talk of Mr. Parnell paying a visit to India. It is cer-tain he will take so long a holiday that he will be absent when parliament reassembles next year. During the present session he has almost deserted the House of Commons. His absence has weakened his hold on his party, in which there are not a few grumblers. Some of William O'Brien's section say an effective leader could have lessened Balfour's success. The fact is Parnell's health is again a source of anxiety to his friends. He is no longer a vege-tarian, but takes a little animal food. He is subject to frequent attacks of cold, which leave him weak and depressed.
