# Sanitas Water Closet

## THE SANITAS PATENT WATER CLOSET

*Has the simplicity of the Short Hopper, all the sanitary advantages and conveniences of the best improved modern closets, and others peculiar to itself, in being anti-siphonic, quick-acting, self-sealing, free from spluttering or waste of water, and, when properly set, almost noiseless in operation.*

The supply pipe between the cistern and the closet stands permanently full of water, and, discharging below the level of the standing water in the bowl, the action is instantaneous and the noise of flushing is deadened, so that when properly set and with the cover down and toilet-room door closed, no sound can be heard from without. The water is held in the supply pipe by atmospheric pressure, and will instantly restore the trap seal should it at any time be lowered by evaporation or siphonage.

**The Sanitas Water Closet.**
