

pursuant to paragraph 2 of this Article, shall be twenty inspections in each annual period.

6. A The number of on-site inspections which may be carried out in each annual period in territory under the jurisdiction or control of a Party other than an original Party, pursuant to paragraph 3 of this Article, shall be, with respect to each such Party, two, or such higher number as the Commission may, after consultation with the Party, determine by a two-thirds majority of those present and voting.

B. Pending the determination of a Party's number by the Commission, the provisional number for that Party shall be one inspection in each annual period for each 500,000 square kilometers or remaining fraction thereof of territory under its jurisdiction or control, except that for each Party the provisional number shall be at least two inspections in each annual period. Inspections carried out under a Party's provisional number shall be deducted from the number subsequently determined for that Party for the annual period in which such inspections were initiated. In the case of acceding Parties, the Preparatory Commission shall, after consultation with such Parties, promptly recommend, for subsequent approval by the enlarged Preparatory Commission an appropriate number of inspections to be carried out in each annual period within territory under the jurisdiction or control of such Parties.

7. The number of on-site inspections for each Party shall be reviewed by the Commission within three years after this Treaty enters into force and annually thereafter. In light of each such review, which shall take full account of practical experience in the operation of the System and of measures taken to maintain or improve its effectiveness, the Commission may fix revised numbers, provided that no number (A) shall be less than two, (B) nor less than twenty per cent of the average annual number of events of seismic magnitude 4.75 or above which are located by the System in accordance with paragraph 2 of Article 8 of Annex I, provided that when criteria for the identification of seismic events eligible for on-site inspection are agreed, no less than thirty per cent of the events remaining unidentified after the application of such criteria, occurring in territory under the jurisdiction or control of the Party to which the number relates. Such average annual number shall be based on data from control posts and research programs
