12 Plants for the production of heavy water

A "plant for the production of heavy water" includes the plant and equipment specially designed for the enrichment of deuterium or its compounds.

(B) Non-Nuclear materials for reactors:

- 1. Deuterium and heavy water: Deuterium and any deuterium compound in which the ratio of deuterium to hydrogen exceeds 1:5000 for use in a nuclear reactor, as defined in paragraph (A)1 of Annex C in quantities exceeding 200 kg of deuterium atoms in any period of 12 months.
- 2. Nuclear grade graphite: Graphite having a purity level better than 5 parts per million boron equivalent and with a density greater than 1.50 grams per cubic centimetre in quantities exceeding 30 metric tons in any period of 12 months.
