### GOOD FORECAST FOR RAY CONSOLIDATED

Believed That Stock is Entitled to a Higher Valuation. in the Market. Despite the inactivity of Ray Con-

solidated in the market, actual condi-tions of the property and earnings of the company are more encouraging, eccording to a well-known proker. During 1915 Ray will not makes as good a showing as other porphyry coppers, owing to lator difficulties, but the elimination of these troubles and the placing of the company upon a abstantially better preduction basis, it is believed, entitles the stock to a higher market valuation. Ray Consolidated this week raised Consolidated this week raise hay Consolidated this week raised its dividend sate from \$1.50 to \$2 a share annually. A further increase is expected next year, because of the calling of Ray Consolidated's outstanding bonds and the elimination of the necessity of creating a sinking fund. As against the dividend rate of \$2 a share annually, Ray Consoliof \$2 a share annually, Ray Consolidated's earnings at the present time are nearly \$5 a share, based on a production of 70,000,000 pounds of copper annually at a cost of \$1-2c a pound, with copper selling at 19 3-4c a pound During '15 Ray Consilidated's earnings were approximately \$2.80 a share, but the operations of the year do not re-

flect accurately the present condition of the property nor its prespects for 1916. It is anticipated that during the coming year Ray Cons lidated will produce at least 90,000,000 pounds of copper at a cost of 8c per pound, which will indicate earnings of approximately \$10,000,000, or around \$6.50 a share annually on the authorized capitaliza

Consolidated is yielding on the current dividend rate of \$2 a share annually, approximately 8 per cent. on the in

## IMPORTANT ORE BODIES LOCATED ON McINTYRE

One in Schist Nineteen Feet Wide at Seven Hundred Foot

The following announcement was made by the McIntyre management yesterday. "Diamond drill hole No. 66 from station on the 700-ft. level at No. 5 staft, put down at an angle of 37 degrees, previously reported as having cut 3½ ft. of quartz, at a vertical depth of about 760 feet from the surface. This ore body is enclosed in a body of schist 15 ft. wide. The whole body, including the quartz, gives an average assay of \$18.66 per ton.
"The cross-cut north from No. 5 shaft on the 500-ft. level has inter-sected a new body of ore. The cross-

cut is in ! feet, and still in ore, the

first 61/2 feet of which assays \$21.67
