... AND MANUFACTURERS

Dominion Dry Kiln Company

MANUFACTURERS OF

THE ANDREWS

For all kinds of Lumber, Staves
etc., etc.

THE NOYES

Especially adapted for the Rapid Drying
of Thin Lumber

LUMBER DRY KILNS

THE ANDREWS LUMBER DRIER

HAS BEEN PROVED TO POSSESS THE FOLLOWING POINTS OF EXCELLENCE :

- 1st. That its drying is rapid and perfect.
- 2nd. That external and internal checking and discoloration are entirely avoided by this method.
- 3rd. That the drying is done by a continuous system and the temperature of the kiln is under absolute control at all times.
- 4th. That our Drier is free from the varying air currents (always wasteful) incident to all fan and open-draft kilns.
- 5th. That our drying is done by the slow continuous movement of a large body of slightly moistened air.
- 6th. That our condensing surface is so very large as to be adequate to precipitating the moisture of the saturated air with the least amount of movement.
- 7th. That our piping is tested by high pressure and every outfit is fully guaranteed.
- 8th. That by our improved system of drainage the freezing of pipes becomes impossible.

NO FAN	NO CHIMNEY	NO SPECIAL FIREMAN OR FUEL	NO RISK OF FIRE
NO ENGINE	NO SMOKE	NO EXPENSIVE BRICKWORK	NO CHECKING OR WARPING
	NO CASE-HARDENING	NO EQUAL	

THE SEASONING OF LUMBER.

WE DO ARTIFICIAL SEASONING RAPIDLY, WITHOUT INJURY TO THE STOCK, AND WITH THE GREATEST ECONOMY OF FUEL AND LABOR. THE ANDREWS KILN IS THE PERFECT LUMBER DRIER.

ITS remarkable efficiency depends upon its peculiar mode of applying heat to, and eliminating moisture from, the air used in drying. We use no fan, engine or other device that requires constant attention, nor do we waste heat by a special chimney or ventilator, nor do we reduce temperature by introducing cold-water pipes or freezing mixtures for condensing purposes. We use a perforated pipe under the lumber, so arranged that, when required, the air at one end can be impregnated with additional moisture. This penetrates evenly the lumber above it, softening the surface, and is of very great advantage where case-hardened lumber has been put into the drier.
