☾ The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Newport, Windsor, Truro, &c.

TRAIN the mind to right reasoning. There is a class of persons sadly deficient in this important faculty. Rising up early and sitting up late, and laboring hard, they can scarcely keep free from pressing want. The fault is not in their labor, but in their plans—in the arrangement of their business. They do not adopt the best method to perform their labor, and consequently work to disadvantage. It is of no kind of use to be "hurried to death" from early in the spring till late in the fall. Sit down and calculate, taking all things into consideration,—see how much you can plough, plant, hoe and harvest, and then go to work systematically. Not only estimate the amount of your labors, but to do everything the best way, and do one thing at a time. It is folly to commence a piece of work and leave it half finished for something else, to be left incomplete. What ought to be done should be finished, and what ought not to be done should be let alone. Look around you and see the various methods in which your neighbors perform their labors. Do not suppose that you know more or can calculate to better advantage than others. Make your observation and experience available for your future improvement.
