The Best Safeguard investors can have is the character of the men at the head of the Company.

This Is a Development Company,

its object being to purchase, develop and sell mines. Capital is necessary to make mining a success. By combining many small amounts of money investors have all the advantages of large capitalists, with the additional advantages of skilled engineers and practical mining men employed by this company.

Buying, Developing and Selling Mines is a OUICKER way of making money than waiting for mines to pay dividends.

This Company has already purchased and owns free and clear three valuable mines—one, of which is developed by a shaft one hundred feet deep and a level driven from the bottom fifty feet on the vein, exposing a strong, well-defined true fissure vein, varying from three to six feet in width. The ore varies from \$10 to \$92 per ton in gold, and is increasing in both width and value as depth is attained. A fifty-feet shaft has been sunk on another vein, exposing good pay ore, varying from two to three and a half feet in width. A third vein has been opened by a twenty-feet shaft. These mines all produce **free milling** gold ore of high grade. Work is now being prosecuted on these mines and will be continued all winter. We have secured options on a large number of choice mining properties on which development work will be started. Many more promising prospects are being offered us. Only those that will stand the most thorough expert examination will be purchased and developed. This company has employed experienced mining engineers and excited mining men.

This company has employed experienced mining engineers and practical mining men. Careful manage-ment, combined with the best engineering skill, will undoubtedly make this company a great success, assuring those who invest with us large profits and quick returns.

owning and operating four adjoining dry ore silver claims, known as the "London" group, situated in the heart of the Slocan. **THE "LONDON.**" one of the group, is a developed mine of immense possibilities itsels three **Smelter returns** from it show 150, 190 and 267 ozs. of silver to ton. **THE COMPANY** is incorporated under British Columbia laws. **CAPITAL SID.000**, in 600,000 chares 25c cach. **PROVISIONAL DIRECTORS-O.** T. Stone, General Agent, Kasle, President and Treasurer: Hamiton Byers, Merchant, Kasle, A. Whealler, Barrister-at-Law, Kasle,

F. H. THOMPSON & CO., 34 Toronto-st., Toronto.

THE BONDHOLDER MINING COMPANY, LTD. Capitalization \$1,000,000. 1,000,000 Shares; Par

Value \$1. Fully Paid and Non-assessable.

Owns six claims-Lone Star, Pine Log, Rosebud, Bondholder, Heather and Thur-located between Springer Creek and Ten Mile Creek, near Slocan City. The Bondholder group of claims begin 3,000 feet from the Enterprise mine and have the same lead. Rich pay ore is being taken from two of the claims owned by the company. The company will begin to ship ore as soon as the trail will permit of it being rawhided. Limited number of shares 15c per share.

R. H. TEMPLE, 9 Toronto St.

the Public at 25 Cents.

The rest of the Shares are pooled and will not be offered for sale until the development fund has become ample to place the mine on a shipping basis.

The Princess Mine is situated on Location 118D, on Black Sturgeon Lake, $2\frac{1}{2}$ miles north of Ross-land Station on the C. P. R., and $7\frac{1}{2}$ miles from Rat Portage, to which there is a good road from the mine and water communication from Rossland Station, Ontario.

It was discovered in 1894 by Mr. Wallace, a well-known mining expert, whose reputation at the Ontario Bureau of Mines is of the highest. In his letter, dated October 20th, 1894, he thus speaks of Location 118D (Princess Mine): "When work has been done will prove a perfect BONANZA GOLD PROPERTY. I am prepared to stake my mining reputation on the result."

Two Parallel Veins have been already located on this property, one of from four to six feet, and the other twelve to twenty in width. The main vein is a continuation of the Scramble This vein is one of the largest in Ontario, being now shown to be forty feet in width at a depth of sixty feet at the Scramble Mine, which is now fully equipped for the production of ore in large quantities. The average assays are \$80.76.

REPORTS.

MR. Z. J. S. WILLIAMS, M. E., who has been employed and sent out to Canada by the great mining firm of John Taylor & Sons, 6 Queen-St. Place. London, England, says : "The ore in these veins is perfectly free milling. . . . I have seldom had the pleasure of examining a property that shows such promise of lasting success as this does."

MR: S. V. HALSTEAD of Rat Portage says: "It is a continuation of the Scramble Vein. There is nothing found in the country greater than the Scramble."

The stock is non-assessable and without personal liability, under and by virtue of a contract dated January 7th, 1897, between Alexander H. Dixon, Geo. H. Maurer and William Hanson Boorne, of the one part, and The Smuggler Gold Mining and Milling Company (Limited), of the other part, duly filed with the Provincial Secretary for the Province of New Brunswick.

A Shaft sunk to a depth of 110 ft., all in rich ore.
A Mill test of over 3 tons, averaging \$153.70 per ton.
A Record of nine assays, ranging from \$42.49 to \$503.32 per ton.
A Highly satisfactory report from Gold Commissioner Lambly of British Columbia.
A Class of ore which can be treated by stamp mill and cyanidation on the spot, thus saving all transportation charges and reducing treatment expense to less than \$6 per ton.
A Highly satisfactory report from Gold Commissioner Lambly of British Columbia.

THIS IS AN INVESTMENT OF GREAT PROMISE. Shares 25 cents each in blocks of not less than 100.
