Meet Steady De-Sentiment Well Divided on mand, Rising One to Local Outlook and Advances Will Meet Realizing. Two Points.

With the close of the week the re-New York, March 25.—Rails were the sing features of Saturday's brief cent war loan has been satisfactorily very active session, that division for disposed of, and to this extent the Toronto Stock Market was expected to of the preceding day, presumably express relief. Saturday's business prospects of higher freight and was insignificant, and there was no feature in any section of the market. was insignificant, and there was no feature in any section of the market. The effect of the Dominion Steel dividend within a point of yesterday's final but Bethlehem Steel, Shippings liotors were moderately reactionary. Canadian Pacific and Union Pacific, in to almost 2 points, Utah provine exception, falling back under the exception, falling back under but making full recovery later, in Locomotive was strongest of the making full recovery later, in Locomotive was strongest of the ments, rising 3 points to 60%.

The effect of the Dominion Steel dividend wore itself off by a further reaction of half a point. The other steels were quiet, but the Steel Company of Canada shares were kept well to the fore, necessity apparently warranting this. Maple Leaf was also well sustained from the inside. Next week should show whether there is still anything left to discount in the Canadian situation on the bull side, or whether a more long-distance review might not reveal conditions which might justify the selling side. Sentiment is more than usually well divided on the market outlook, and if further advances are provoked by pools considerable realizing will certainly be encountered. steels were quiet, but the Steel Company of Canada shares were kept well to the fore, necessity apparently warranting this. Maple Leaf was also well sustained from the inside. Next week should show whether there is still anything left to discount in the Canadian situation on the bull side, or whether a more long-distance review might not reveal conditions which might justify the selling side. Sentiwere generally higher today on ansion of dealings. Total sales lue). aggregated \$2,385,000

ATTENTION TURNING REMARKABLY RICH

Satisfactory Progress Being Made in Underground Development.

A great deal of interest attaches to the resumption of operations at the Newray mill owing to the fact that this plant produced \$200,000 in gold ris of a fabulously rich vein on me property of the Hollinger dated Co. have come thru in it week, and denials of the ne-prorting to be of an official na-we also been received, but from eat report received on Saturday from the ore recovered from the main vein under the former management. It is expected that the present com-It is expected that the present company will have no difficulty whatever in maintaining a substantial production basis, as development work has proven the property to be one of the most promising in the Porcupine area. Newray has always been regarded as one of the most valuable mining holdings in the Porcupine camp. It comprises 321 acres in the great Hollinger-McIntyre zone and is directly in the line of strike of the big veins which have made the Hollinger-McIntyre belt famous. It is notable that a straight line drawn from the central point of the original Hollinger holding thru the centre of the McIntyre and Jupiter properties and continued thru the Plenarum would pract report received on Saturday Smith & Amos from their tative at Timmins it would he report received emphasis is on the richness of the body of scovered on vein No. 58 on the ot level of the Acme. The comication is as follows: here are many reports of its rich-but it is without a doubt one of dehest veins yet discovered in Por-ne. Until this very rich pocket. struck values were running at Intyre and Jupiter properties and continued thru the Plenarum would practically cut Newray in two. From the etandpoint of location the company thus has everything in its favor, and the result of diamond drilling has borne out in every detail the favorable anticipations outlined on that account. At the present time Newray is developing on the 400-foot levol, where a crosscut will intersect the veins proven up by the diamond drilling last year. The face of the crosscut is heavily slicified and the rock is well fractured; so that good news regarding follows: then this pocket was encountered.
is a solid mass of gold. Very
rock is in the ore at all, and it being taken to the refinery as it taken out of the ground. After a is fired they pick up anywhere \$25,000 to \$35,000 in free gold, taken above ground. Of course, veine is not a new find. It was ated to contain about two and a nillions in the annual report, but developments will make it one richest veins in Ontario. It fractured so that good news regarding the picking up of the first vein should be received any day. The indications are that there are very extensive ore bodies available on this level, and the company is specified. he noted that the position of the m on the Hollinger map has it as se proximity to the McIntyre ne. The rich pocket of ore was found out 100 feet further on in the map

CANADIAN OFFICERS IN IMPERIAL OFFICES

To Spend Three Months Learn ing Inner Machinery of War Work.

Canadian Associated Press Cable. London, March 25.—A considerable number of Canadian officers are now working in the war office in order to gain experience of the highest in-ner administrative machinery. This was arranged for by Sir George Per-ley, who was met in the most amic-able fashion by the permanent offi-cials of the war office. It is believed these officers will remain there for about three months, and will then be replaced by other Canadians. In this

M'INTYRE STRONG ON GOOD BUYING

Bid. Better Tone Noticeable in Gold Stocks-May Prove to Be Turning Point.

> A better demand for stocks than has been noticeable for days past infused more life into the proceedings at the Standard Stock Exchange on Saturday morning and offered considerable encouragement to the bull side, who book full advantage of the improvement to prophesy a general advance thruout the list. The opinion was expressed and generally received that the market had reached rock bottom, and that now that the war loan sub-scription had been closed, that public attention would once more turn to the

mine stocks. Persistent buying of McIntyre and a ready response shown by the advancing price was pointed out as an indication of what will happen when the customary spring activity developes. The demand for McIntyre which has been noticeable for some time past became more urgent with the result that a sharp upturn to 190. was made with 189, bid on the close for any amount of stock up to fifteen housand shares.
Predictions were being made

the stock would shortly be put on a 6 per cent, quanterly basis. There is a possibility that the activity and strength of McIntyre will act as a stimulus to the whole list, and serve to drag it out of the rut into which

it appeared to have settled.

Newray was stronger at 131, Vipond was in good demand, which forced the price up to 46. West Dome was stronger, selling up to 28 1-2. stronger, selling up to 28 1-2.

Apex was slightly better at 9 1-3,
Dome Lake on the other hand was
softer, going back a point to 19, a
new low record since 1915. Thompson-Krist failed to recover, selling at 19 1-2

to 20.

Little attention was paid to the silver stocks, but stocks generally were about steady. Beaver, however, sank further to 40. Great Northern was firm at 15 and Hargraves steady at 20. Shamrock eased off again to

LARGE TONNAGE OF ORE AT DAVIDSON

Work on Three Levels Carried Forward Vigorously.

Development work is now far ad-vanced on three levels on the David-son mine at T00 feet at 200 feet and vanced on three levels of the David son mine—at F00 feet, at 200 feet and 300 feet. On each of these levels large bodies of high grade ere have been blocked out. So extensive have the ore bodies put in sight become that the mine is ready to be placed on a production basis. On the hundred-foot level the ten-foot vein assays from \$11.60 to \$312 to the ton. On the 200-foot level the vein is 150 feet wide, and assays up to \$55 over a considerable area. On the 300-foot level the vein is 160 feet wide and ranges in value from 40c to \$65,000 per ton. At this level there is a sreat deal of high-grade ore, and a lot of low-grade ore also. The policy of the management is to devlop on this level so that the body may be mined as a whole. An effort will be made to 50 block the ore out that it will make an average yield of \$10 per ton.

WHEAT ASCENDS ON WINTER LOSSES

Heavy Killing By Frost Stimulates Grain Market

at Chicago.

whole. An effort will be made to so block the ore out that it will make an average yield of \$10 per ton.

In view of the actual showing given above, and further results of levelopments of an important nature to be announced shortly, it will be worth while for the investor to study the Davidson at the present market value.

Chicago, March 25.—Big losses in acreage as a result of winter killing did much Saturday to hoist the value of wheat. The market reacted because of profit taking and in the end was unstitled at the same as yesterday's finish to 2%c up with May at \$1.91 and July \$1.63%. Corn gained %c to 1½c, oats closed %c off to 1½c advance, and provisions unchanged to 17c higher.

Reports from 11 leading states indicated that abandonment of winter wheat.

Reports from 11 leading states indicated that abandonment of winter wheat territory aggregated 4.885,000 acres, the heaviest total ever known, except once. This showing with a fresh flood of damage reports from west of the Missouri River led to unusually free buying that carried the market to the topmost prices which the new crop deliveries have attained this season. Prospects of increased co-operation of the U.S. in supplying foodstuffs to the entente nations counted materially as a help to the bull side of the market. In addition, there were rumors current that Argentina was about to declare an embargo on the export of all grain.

were rumors current that a shout to declare an embargo on the export of all grain.

Anticipations of a good sized falling cff in the U. S. visible supply total on Monday offset to some extent the influence of heavy realizing sales in the least hour. In connection with the visible supply outlook, significance was attached to word from a Texas exporter that he had sold out all his wheat to allied government buyers and that they were taking everything in sight.

Aggressive buying made corn soar to a new high record price for the season. Rumors of an Argentine embargo and the continued scarcity of rural offerings were the immediate cause.

Oats were slightly higher in sympathy with other grains.

Provisions derived strength from the higher quotations on hogs and grain.

CHICAGO GRAIN

J. P. Bickell & Co. report Open. High. Low. Close. Close.

193% 190% 191 190% 164% 160% 163% 160% 149% 146% 148% 146% 115. 116% 114% 116% 115% 113% 116% 115% 61% 60% 61% 58% 57% 58% 61 581/8 .19.72 19.95 19.72 19.92 19.75 .19.75 19.97 19.72 19.92 19.75 May18.05 18.20 18.10 18.17 18.05 July ...18.12 18.30 18.12 18.27 18.17 WINNIPEG GRAIN MARKET.

Winnipeg, March 24.—Tho prices were only fractionally changed at the close, the market did not appear any too strong. Winnipeg May closed %c lower; July %c lower, with October %c higher. Oats were %c up for May, %c up for July, and %c higher for October. Barley gained %c. Flax was unchanged for both May and July.

At the opening the market appeared very irregular. The trade in the local pit was erratte and active, but the range was narrow and the total volume light. Two big firms were on the selling side, with several commission houses on the buying side.

The trade in coarse grains was similarly limited. Oats were slightly higher at the close. The advance was mostly due to short covering, not to good buying. Flax passed thru a very dull day.

A feature of the cash market was the withdrawal of the government from the buying side. The demand was poor for some grades, and the spreads were off, from unchanged to %c. Oats were unchanged. Barley moderately fair. Flax dull.
