Jeanne of the Marshes

—BY—
E. P. OPPENHEIM

(Continued)

"Until she is of age," the Princess answered, "she is mine to do what I like with, body and soul. The French law is stricter than the English in this respect, you know. There may be a little trouble, of course, but I shall know how to manage her."

"She has likes and dislikes of her own," he remarked, and fairly positive ones, I believe if she had her own way, she would spend all her time with this fisherman here."

The Princess smoothed the lace upon her gown, and gazed reflectively at the turquoise upon her white fingers.

"Jeanne's father," she remarked, "was bourgeois, and her mother had little family. Race tells, of course. I have never attempted to influence her, when there is a great struggle ahead, it is as well to let her have her own way in small things. Hush! She is coming. I suppose the croquet has been a failure."

Jeanne came across to them, swinging her mallet in her hand.

"Will someone," she begged, "take our too kind host away from me? He follows me everywhere, and he is not satisfied. If I try to ride, he comes and sits by my side and talks nonsense. If I say I am going for a walk, he wants to come with me. I am tired of it."

The Princess looked at her step-daughter critically. Jeanne was dressed in white, with a great red rose stuck through her waistband. She was paler even than usual, her eyes were dark and luminous, and the curve of her scarlet lips suggested readily enough the weariness of which she spoke.

The Princess shrugged her shoulders and said: "Do what you like, my dear," she said. "I will tell Cecil to leave you alone. But remember that he is a young man, and you must be civil to him."

She strode across the lawn to where Cecil was still knocking the croquet balls about. Jeanne sank into her place, and Forrest looked at her for a few moments attentively.

"You are a strange child," he said at last.

She glanced towards him as though she found his speech an impertinence. She looked away across the old-fashioned, strangely-arranged garden, with its irregular patches of many-colored flowers, and the curve of her scarlet lips suggested readily enough the weariness of which she spoke.

The Princess shrugged her shoulders and said: "Do what you like, my dear," she said. "I will tell Cecil to leave you alone. But remember that he is a young man, and you must be civil to him."

OCTOBER WEDDINGS; ST. JOHN BRIDES

Coates-Roach.

A quiet wedding took place this morning at the residence of Mrs. Sarah Roach, 178 Wentworth street, when her daughter, Miss Rose Coates, formerly known as Miss Rose Coates, was united in marriage to Horatio N. Coates, of the S. Hayward Co. The ceremony was performed by Rev. W. H. Hayward, pastor of the Victoria street Baptist church, and at the conclusion Mr. and Mrs. Coates left for the United States and upper Canadian cities.

Both bride and groom have many friends who remembered them with beautiful and costly gifts. From the bride's former employers and fellow workers in the W. H. Hayward Co. she received a set of silver and Wedgwood china, and from the staff of the S. Hayward Co. a handsome quartered oak china cabinet, was sent her.

Flugs were flying from the S. Hayward Co.'s building today in honor of the event.

Clark-Fowler.

George H. Clark, accountant for J. Coates & Son, and Miss Fowler, daughter of the late J. D. Fowler, were married yesterday at the bride's home, Frederick, by the Very Rev. Dean Schofield, and set off for St. John to spend their honeymoon.

Downey-Dunn and Gillen-Dunn.

A matrimonial event of an unusual nature took place at St. Bridget's church, Chapel Grove, yesterday morning at 10 o'clock. The wedding was a double one. Miss Kathleen Downey and Daniel Downey, North End, were united in marriage, and simultaneously Miss Jennie Dunn and Harding Gillen, of Millville, were made man and wife. The brides are daughters of the late Bernard Dunn, of Whitehead. Rev. Joseph Downey performed the ceremony, and the groom stood in the place of the bride's father. The brides were dressed in costumes of cream Bedford cord made in the princess mode with insertion trimmings. Miss Kathleen, and Miss Annie Dunn acted in the same capacity for Miss Jennie and Miss Gillen. The brides were escorted by Miss Kathleen, and Miss Annie Dunn acted in the same capacity for Miss Jennie and Miss Gillen. The brides were escorted by Miss Kathleen, and Miss Annie Dunn acted in the same capacity for Miss Jennie and Miss Gillen.

DOCTORS SAID ONLY ZAM-BUK COULD CURE HER ECZEMA

In view of the numerous cures which Zam-Buk has worked when all else has failed, there is little wonder that the end doctor attending Mrs. J. P. St. Denis, of 395, Thompson Street, Winnipeg, should tell her there was nothing but Zam-Buk could cure her. The result showed the farseeing wisdom of this practitioner, and having been completely cured by Zam-Buk, Mrs. St. Denis gives her experience for the benefit of other sufferers.

She says: "Eczema started on one side of my face and nose. At first it was only a sore, similar to what one feels when having a bad cold, but it soon became a thing that would not pass away. One day one of the disease developed pimples and turned a purplish red. It was part of the cheek on the left side. The pimples were then broken out, and the skin cracked in places and peeled off in scales, leaving my face and nose raw and sore. This condition existed for several months, and I became very ill. I could get no sleep at night because of the irritation and the pain, and my face was in such a shocking condition that for two months I did not go out of the house. I applied remedies which were supposed to be good for skin diseases, but in vain.

"My doctor also treated me, but without effect until one day he said that the only thing which would now be likely to cure me was Zam-Buk.

"Acting on his advice, I procured a supply and found that even the first few applications had a soothing effect on the sores. I left off everything else, and used only this balm, and applied it liberally every day to affected parts. In a remarkably short time, considering the obstinate nature of my case, the sore traces of improvement, which encouraged us to persevere with the Zam-Buk treatment. Zam-Buk relieved the inflammation, and the hard swelling began to show traces of leaving, the sores seemed less angry, and in about three weeks' time most of the sores were healing nicely. To cut a long story short, I continued with the Zam-Buk treatment until my face was cleared completely of all traces of the troublesome and painful eczema."

Such was the experience of Mrs. St. Denis, and scores of other sufferers could tell of similar experiences. Zam-Buk is Nature's own healer, being composed of pure herbal healing essences, and free from all traces of harmful animal fat or mineral poison. It is a sure cure for cuts, lacerations, burns, eczema, ringworm, poisoned wounds, festering sores, bad legs, and all skin injuries, and diseases. Zam-Buk is also a cure for piles, druggists and stores everywhere sell at 50c a box, or post free from the Zam-Buk Co., Toronto, on receipt of price. You are warned against cheap and harmful imitations sometimes represented as "just as good."

SIR WILFRED LAURIER ON EDUCATIONAL MATTERS

Timely Thoughts in Address By Prime Minister at Laying of Corner Stone of Montreal Technical School—Large Representation of Catholic and Protestant Clergy There

The laying of the corner stone of the Montreal Technical School, which is being constructed by the Quebec government in Montreal, brought out a large and distinguished body of citizens.

The presence of the prime ministers of the dominion and the province of Quebec, the Lord Bishop of Montreal and a large representation of the Catholic and Protestant clergy, gave more than accustomed eclat to the function.

Sir Wilfred Laurier paid a tribute of praise to all those, whether near or far, who had been connected with this enterprise of a technical school for Montreal.

Sir Wilfred said that the chief merit of those who had succeeded in bringing this enterprise to its present advanced stage was in having awakened the people from their indifference.

After mentioning Mr. de Serres and Mr. White as well as the other members of the corporation the prime minister referred to the fact that some people had perhaps been apprehensive of the aims and objects of the technical school. Such apprehension did not have its raison d'être, for as a matter of fact this technical school was but the complement of the present excellent system. The prime minister declared that the system had the base and the crowning stone, but it was the intermediate that was at fault, and which the promoters of the Montreal Technical School had decided to supply.

Sir Wilfred said he would not change the method of the present classical system of the province, yet the status or level might be improved. If there was any approach to make it was in the fact that the status of classical education was not quite so high as when he was a young man, say forty years ago. Not that the speaker would suppress the study of Latin and Greek. He would maintain the system, but he would endeavor to improve it.

He would also like to see a greater interest displayed in the study of the modern languages. How much more profitable he thought it would be if less time were given to Virgil and to Socrates and more to Shakespeare, to Gibbons and to Macaulay. In a word, the prime minister moved to see education in this country march hand in hand with the spirit of the age. The speaker went on to tell his listeners what the future held in store for this province, especially in the matter of electricity. This school would teach the young men of this province many of the mysteries that we at present ignore, besides placing them on the same intellectual level with those of other countries more advanced in technical education than ourselves.

Speaking of the industrial features, he said that it was fashionable in certain quarters to throw a great deal of blame upon industrial science, but he thought that this was wrong criticism, and not justified by the light of current events in the world.

Sir Wilfred said the time was not far distant when there were but two callings open for the young men of the country and that were the medical and legal professions, but what a change there is today, and how much wider the field would be opened when this finished school of place so many avenues open to the artisans of our land. He urged, in the strongest language at his command, for the young men, to avail themselves of the splendid advantages which would soon be placed at their disposition. He regretted that there was a probability of a night school being opened in connection with this technical establishment, and he regretted that the arrangements were not such that it could be opened simultaneously with the new enterprise.

The late Honorable Mercier conceived this noble idea, but it died with that great patriot, although it had been given to others to revive and carry out, this splendidly patriotic idea of technical education. He then told of some great men who made themselves famous the world over even without the assistance of schools, colleges and universities, mentioning Alexander Mackenzie, here in Canada, Abraham Lincoln on the other side of the line, consequently, if men would become great and beloved by their fellow countrymen without the school then how much greater could we become if provided with such adjuncts as the present technical school. Sir Wilfred was loudly cheered at the close of his address.

CHAPTER XVII.

Andrew looked up from his gardening, startled by the sudden peal of thunder. Absorbed in his task, he had not noticed the gathering storm. The sky was black with clouds, riven even while he looked with a vivid flash of forked lightning. The ground beneath his feet seemed almost to shake beneath that second peal of thunder. In the stillness that followed he heard the cry of a woman in distress. He threw down his spade and raced to the other side of the garden. About twenty yards from the shore, Jeanne, in a small boat, was rowing toward the island. She was pulling at the great oars with feeble strokes, and making no headway against the current which was sweeping down the bay. He was just in time to see her boat dashed against the rocks. She was thrown into the air, and fell into the water. He was just in time to see her boat dashed against the rocks. She was thrown into the air, and fell into the water.

MEETING OF C. P. R.

Montreal, Oct. 6.—At the annual meeting of the shareholders of the C. P. R. today the report of the directors was unanimously adopted. David McNicoll, Chairman, presided. Hon. Robert Mackay, and Hon. James Dunsmyth were re-elected directors.

The president's annual report stated that the gross receipts for the year were quite as large as expected, but working expenses had been abnormally heavy. The cash in hand resulting from the sale of lands and townships exceeded \$18,000,000. Reference was made to the growing area of wheat producing country along the lines and the satisfactory conditions on the main and branch lines.

The sanction of the government-in-holders at the special general meeting held a year ago took the necessary action to provide for an increase of the ordinary dividend from 4 per cent to 5 per cent, and \$200,000,000 and the directors were given authority to issue the additional \$200,000,000 in the same amount and on such terms and conditions as they might determine.

Proposals for improvements and additions on all sections of the road it is proposed to issue 20 per cent of the shares registered in the name of each individual holder in the books of the company in London, New York and Montreal on Nov. 15, and the issue price will be 25.

At a meeting of the board subsequently held, Sir William C. VanHorne was re-elected chairman of the board. Sir Thomas B. Shaugnessy, president of the company, and the executive committee was appointed as follows: Lord Strathcona and Mount Royal, Sir Thomas G. Shaugnessy, Sir William C. VanHorne, Richard B. Angus, Edmund B. Oler, M. P., David McNicoll.

HOW FIREMAN SMITH ESCAPED IN WRECK

Moncton, N. B., Oct. 6.—Tonight Fireman Cook of the maritime express, which was wrecked on Wednesday, is suffering much, and his life is in the balance. Fireman Smith, of the freight special, who saved his life by jumping, returned to Moncton this afternoon. He gave a striking statement about his escape.

Before leaving Charlott station, he had looked at his watch, and said to Driver Whalen, "Bob, do you think we can make it?"

"I think so," was the response of Driver Whalen. So they started, and were running about twenty miles an hour when the other train was sighted.

"My God! 33 is on us!" cried out Fireman Smith, and he jumped from the engine into the ditch. Only a few seconds did he remain there, and then hurried to where the two trains had collided. He found the engine of one of the brakemen and together the two started to help to find the injured.

"As I was going through the air," said Smith, "I heard the two engines meet. It was an awful crash and I knew there would be a frightful end."

Driver Smith was immediately surrounded by many curious persons. He was not very seriously, and was able to walk to his home. The three survivors of the wreck who had less fortunate experiences than those of Fireman Smith, were Driver Whalen, John Murray, of this city, who was badly hurt in the smash, and Mail Passenger on the east-bound Maritime express, and was at the scene of the disaster a very few minutes after the wreck occurred, being thus able to render valuable aid to the injured.

He said Driver Morton and Driver Whalen were each buried under the ruins of the locomotive and crushed to death, in all probability being instantly killed. It was only after hard work, Dr. Bourque said, that Fireman Cook was extricated from his position under the ruins of the locomotive. The unfortunate man was crushed down beneath a great mass of twisted iron and steel, and Dr. Bourque worked his way beneath and did what he could for him. Cook in the meantime was suffering terrible agony, and continually moaned: "For God's sake get me out of this. The unfortunate man was covered with burns and scalds and one foot was crushed off. Cook was wedged close to the firebox and a great sheet of steel crushed him down. There was no jolt with which to remove this weight until the relief train arrived from Campbellton.

LIKELY TO GRANT LEASE TO MR. CRAIG

A meeting of the general committee of the common council will be held on Wednesday to consider the application of David Craig, of Boston, for the lease of lots at Greenhead for the establishment of a cement manufacturing plant. Yesterday afternoon a sub-committee inspected the property. Several dwelling houses located there were found to be in need of repair, but the line kln was shown to be in good condition. A plentiful supply of clay for use in the manufacturing of cement was discovered. The wharves also were found to be in very good shape.

Mr. Craig said that his company would not ask for any privilege on the water front beyond an entrance and landing place on the shore, so that the storage of logs in the case would be determined.

The members of the committee seemed to be favorably impressed with the proposition, and it is probable Mr. Craig's application will be granted.

J. A. BARRY, PRESIDENT

A meeting of the Irish Literary & Bénévolent Society was held in their rooms, Union street last evening. The election of officers for the ensuing year took place and resulted as follows:

President, J. A. Barry; 1st vice-president, John O'Regan; 2nd vice-president, R. E. Fitzgerald; recording secretary, Frederick L. Waters; treasurer, Edward Moran; financial secretary, James McCarty; trustees, Matthew O'Neill, J. O. McWilliam, J. W. Duddy; librarian, Arthur McHugh; assistant librarian, Thomas Lawson; sergeant-at-arms, John Callahan.

A committee was appointed to arrange for a series of lectures which will be given during the coming winter. Judge Barry will deliver the first address.

Hon. Sydney Fisher will ask for approval of new experimental farms in the west.
