THE BANK OF NEW BRUNSWICK

Special Meeting of the Shareholders

NOTICE is hereby given that a special general meeting of the shareholders of The Bank of New Brunswick will be held at the office of the said Bank in the City of Saint John, New Brunswick, on Monday, the 19th day of November, 1912, at the hour of eleven o'clock in the forenoon, for the purpose of considering an agreement for the sale by the said Bank of New Brunswick of the whole of its assets to the Bank of Nova Scotia, and for the purpose of authorizing the Board of Directors to give all such notices and make all such applications and to pass and execute all such other acts, resolutions, matters and things as may be deemed necessary for procuring the approval of the Government in connection with the said agreement and for carrying out the same and for winding up the affairs of the Bank and distributing the proceeds of the sale.

By order of the Board,
C. H. EASON,
General Manager.
St. John, N. B., October 19, 1912.
12-9.

PROPOSITION
This house built to order on Sherbrooke, Montreal, or Simms streets in "Fairville Plateau." Divided into four flats, each with modern conveniences for \$2,000. Including land. Small cash payment, balance easy terms. Information from John W. Badger, 124 St. Peter street, Montreal.

MIGHT HAVE BEEN WORSE
At St. Andrews some years ago an old farmer and his ploughman were cutting and from the seashore. They were behind the target on the rifle-range, but hidden by a bank of sand from a party of volunteers, who were then on foot at practice. A stray bullet struck the ploughman on the leg, and he immediately dropped, exclaiming: "I'm shot!" Without more ado the farmer scrambled up the bank and, waving his hand to the volunteers, shouted: "They, lads, stop that, will ye? You've shot a man, and it might have been the horse!"

To prevent the skin from discoloring after a fall or blow, take a little dry starch, moisten it with cold water, and lay it on the injured part.

"77" FOR GRIP & COLDS

The uncertainties of autumn weather have caused an epidemic of influenza and Coryza according to the Health Department.

It especially affects persons of advanced age and men and women whose constitutions had previously been weakened.

It is known by lassitude, shiverings, weight in the head, sneezing, watery eyes, obstruction of nostrils, followed by cough, hoarseness and sore throat, pains and soreness of limbs, fever, loss of appetite.

It is not when the body is hot, but when it is cooling that it is most susceptible.

Dr. Humphreys' "Seventy-seven" preoccupies the system, prevents and breaks up the Cold. All Druggists 25c. or mailed.

Humphreys' Home Medicine Co., Cor. William and Ann Street, New York.

IS MODEL FACTORY ENJOYING THE BEST OF HEALTH

In New Simms Building Employees Are Well Looked After

LIGHTING IS EXCELLENT

Plans Make For Minimum of Energy and Time in Sending the Work Through the Various Stages — Fire Well Guarded Against — Lawns and Trees on Grounds

The new factory of T. S. Simms & Co., which they will occupy about the 10th of December is not only a model in construction and convenience but special provision is made for the comfort and pleasure of their employees. The walls of this great factory with about 25,000 panes of glass, will be 80 per cent light, and it is so laid out that every employee will have ample working space. On each floor a six foot aisle extends from end to end of the building, leaving twenty-two feet on either side for the machines. When artificial light is necessary it will be provided by 800 tungsten lights of 40 to 150 watts each.

There are in the factory forty-eight toilet and seventy-five wash basins, each basin supplied with both hot and cold water. The closets are fitted up with modern plumbing and they are located at intervals on each floor.

At the end of one floor a lunch room will be provided. There will be tables, each to seat four people, and enough of them to accommodate 200 persons. A woman will be in charge of this department, and hot soup, stew, tea, and coffee will be served to the employees at cost or less. This will prove a great boon to employees of the company who live in the city or elsewhere at a distance from the factory.

It is the intention of the company to lay out their grounds in an attractive manner with lawns and trees, and they hope eventually to be able to erect a welfare building for the benefit of their employees.

Mr. W. Simms said to the Times that they desired to do everything possible for the convenience and comfort of their employees so that there might be a spirit of goodwill and co-operation throughout the establishment.

This factory has been constructed according to plans which were worked out by Mr. Simms. The factory is situated on the various departments during very many consultations held last winter, with a view to routing out the points where it entered the building from the point where it entered the building until it came out as a finished product.

This factory is of what is called mushroom type, and is a very handsome effect. The whole factory is painted white with cold water paint, with the exception of a five foot wide band in green oil. The only wooden floor anywhere in the building is 20 feet at one end of one floor, over a portion of the basement, and it is of mill construction on concrete slabs with a hard wood surface. The purpose in placing a wooden floor there was to get rid of the noise of the dust collecting system in the woodwork department, and make it better adapted to the work.

Where fire screens are necessary in the building they are made of steel and in the plaster. There are two elevators and two fireproof stairways.

The company have their own water supply from a well capable of producing 100,000 gallons per day. There is a 40,000 gallon tank on the roof and a 10,000 gallon tank for laundry purposes and in the grounds a 100,000 gallon reservoir.

The factory generates its own electric light, and is provided with a vacuum system of return heating. It will also have its own telephone exchange.

Power for the machines in the factory will be provided by about thirty motors. The factory will employ at the outset 200 persons, but this number can be doubled without further enlarging the plant. The building is 400 feet long and fifty feet wide, four stories and basement. There is a power house 60x60 feet, and dry kiln 60x25 feet, two stories high. These are built of hollow tile. There is also a lumber shed 150x25 feet, and a saw mill 100x25 feet. The Grand Rapids kilns, which are six, separated by tiles, are a special feature.

The Abernethy Construction Company of Boston began digging for the foundation of the building on April 18th, and laid the roof on September 7th, although in that period they had thirty days because of the weather. The main building is now practically complete, and as before stated, the firm expects to occupy it about the 10th of December. This factory is a great addition to the industries of St. John, and the largest brick and brown factory in Canada. It is also one of the most modern and up to date plants for this special work to be found anywhere. It is the only factory of mushroom construction in the lower provinces.

THE STORY OF THE "ALICE" SHOW

How the Fairy Musical Extravaganza is Going to Be Produced in the Opera House All Next Week

Alice in Wonderland is a happy mixture of tinsel music, gorgeous costumes, and a most efficient and scenic effects and all kinds of beautiful lighting embellishments. As produced here, commencing Monday night, it will include nearly 800 children and adults, will be a continuous jangle of songs, choruses and a mass of dances, ballets, marches and ensembles.

The prologue introduces the Fair Queen and Scene 2 discloses the rose bower, with fairy opening chorus and dancing song. The three then have a lullaby, winding up in a grand chorus. Act 1 is laid in a garden, where Alice chafes with the White Rabbit. Then comes the Mouse's Story, Alice and the Caterpillar. The Fish and the Frog Footman. In the second scene of the first act, Garland hears enter the woodland, the Jolly Salmons, the Elves, the Little Jap Girls, Mother Goose and her children in melody, the Little Wax Dolls, the fairies in their flower drill, and the end of the first act and grand march finale.

Act 2 opens in the kitchen of the duchess, then comes the Mad Tea Party. Scene 2 introduces the Nell Brinkley Girls, scene 3 the Japanese garden and the Cherry Blossom. The end of the act is a grand scene with the painting of the roses, the queen and the croquet party. Scene 5 is a landscape setting with dance and scenery of adults, and the full palace setting in scene 7 deals with the trial, the fatal letter, the accusation, the verdict and the grand finale.

"Today's stage rehearsals in the Opera House have been entirely satisfactory and everything is in readiness for the curtain on Monday evening at sharp 8 o'clock. Tickets are still selling rapidly. The correspondence is settling the project for the sake of the public playground to the performance will be devoted."

NOTES FROM THE VALLEY

George Newcombe and wife of Hopewell Hill, Albert county, have been visiting their son and wife, Mr. and Mrs. Newcombe. At the same time Mr. Newcombe was a delegate to the Grand Division Sons of Temperance, which held its sessions here on last Monday and Tuesday.

St. Paul's Episcopal church, and Zion Methodist church have received considerable repairs lately, and in the spring it is said are to be painted.

Zion Methodist parsonage is just free from the hands of carpenter and painter, and wears a smile after so long a time looking dull. It does credit to the workmen in both ways, and will be far more cheerful and convenient for the pastor and family.

Rev. C. S. Redick occupied the Congregational pulpit last Sunday with satisfaction to the people, and has been requested to supply that pulpit during the absence of its pastor, Rev. Mr. Mahood.

Miss Beaman, who spent the summer at her home in 1912, was here for a few days and has returned for a few weeks to stay, and prepare, by order of Doctor White, for an operation.

Zion people have been expecting their Sunday school to be held on the 10th of November, but it was postponed to the 17th, on account of the weather. The school will be held on Sunday morning and evening by Rev. H. Wigle, M.A., of Amherst.

The Sunday school rally at 2:30 p.m. will be addressed by Revs. Archdeacon Raymond, Gordon Dickie and F. S. Porter. The lecture on Monday night will be by Mr. Wigle on "Ramblings in Palestine." Tuesday will bring a concert by talented talent in the church. L. O. P. men intend being at the morning service in a body. In the absence of the organist, Mr. Amberson, on that part it is expected that cooperation between the St. John and Halifax societies will be perfected to look after the service.

Several houses in this part have been painted lately, adding to the appearance of things, among them some owned by Dr. Andrews. It is rumored that an Albert county young man will occupy one of the latter in a day or two when he has had a maiden to the altar.

RECENT WEDDINGS

At the home of Mr. and Mrs. Amashah Ketch, Querebury, York Co., their daughter, Miss Myrtle Ketch, was united in marriage to Ernest H. Clark, of Musgraveville.

On Thursday at the Methodist parsonage, Fredericton, William Beveridge of Yarmouth was united in marriage to Miss Christina Bubur, daughter of Mr. and Mrs. Angus Bubur of Durham Bridge.

ST. MONICA'S SOCIETY FOR HALIFAX

The ladies of the St. Monica's Society of this city have been corresponding with Catholic ladies of Halifax with a view to establishing a St. Monica's Society in Halifax for the purpose of looking after the Catholic immigrants who arrive at that port. It is expected that cooperation between the St. John and Halifax societies will be perfected to look after the service.

The ladies of the local society are also in correspondence with different parts of Brunswick with a view to having societies formed in different places. The local society is now enjoying a large membership, but it is hoped that it will reach the 500 mark.

RECENT DEATHS

Harcourt, N. B., Nov. 1.—The death occurred at Base River on Thursday morning last, of Kathleen Campbell, daughter of Mr. and Mrs. Edward Campbell, and adopted daughter of Mr. and Mrs. Wm. Keswick. Miss Campbell, who was in her seventeenth year, was ill only a short time with pneumonia, and as the crisis of the disease was passed, and every hope was entertained for her recovery, news of her death came with shocking suddenness to her many friends, and has cast a gloom over the community. She was a bright and winsome girl and a general favorite among her many young friends, in fact, that a gap has been made in their circle, which cannot soon be filled.

A NATURAL INQUIRY.

Immediately following the murder of the gambler, Rosenthal, in New York, the papers were full of stories to the effect that members of the underworld police force cleared the street in front of the Hotel Metropole in order that the assassin might put their victim without interruption.

A night or two after the killing a very tired man was clinging to an awning post opposite the Metropole, in Forty-third street, when a patrolman came by and ordered him to move on.

"Very well!" said the weary one thickly. "I will, officer; but I'd like to ask you a quick question first."

"Well, what is it?" demanded the policeman.

"Who follows first?" to shoot now?"

—Saturday Evening Post.

THE LATEST MANUFACTURED DOLL IS ACCOMPLISHED.

The latest manufactured doll is accomplished. She is adept at kneeling, kicking, dancing, rubbing her own eyes, and crossing her legs while seated.

What is known as the city of London proper has an area of a little more than a square mile, while the county of London has 117 square miles.

PRESIDENT SUSPENDER

NONE SO EASY

ENJOYING THE BEST OF HEALTH

"Fruit-a-tives" Cured His Rheumatism

PROF. J. F. DAVIS
563 Church St., Toronto.

I want to say to the people of Toronto and elsewhere that "Fruit-a-tives" is my only medicine and has been for the last four years. Previous to that I had been very much troubled with Rheumatism and Kidney Disease, and had taken many remedies as well as employing hot applications of salt bags, etc., without getting satisfactory results.

Noticing the advertisement of "Fruit-a-tives," I adopted this treatment altogether, and, as everybody knows, since taking "Fruit-a-tives" I have been enjoying the very best health and find it a pleasure to follow my vocation of Dancing and Dependent Instruction.

There are in the factory forty-eight toilet and seventy-five wash basins, each basin supplied with both hot and cold water. The closets are fitted up with modern plumbing and they are located at intervals on each floor.

At the end of one floor a lunch room will be provided. There will be tables, each to seat four people, and enough of them to accommodate 200 persons. A woman will be in charge of this department, and hot soup, stew, tea, and coffee will be served to the employees at cost or less. This will prove a great boon to employees of the company who live in the city or elsewhere at a distance from the factory.

BREAKS A COLD IN A FEW HOURS—PAPE'S

First Dose Pape's Cold Compound Relieves All Grippe Misery

After the very first dose of "Pape's Cold Compound" you distinctly feel the cold breaking and all the disagreeable grippie symptoms leaving.

It is a positive fact that a dose of Pape's Cold Compound taken every two hours until three consecutive doses are taken will cure Grippe or break up the most severe cold, either in the head, chest, back, stomach or limbs.

It promptly ends the most miserable headache, dullness, head and nose stuffed up, feverishness, sneezing, sore throat, running of the nose, mucous catarrhal discharges, soreness, stiffness and rheumatic twinges.

Take this wonderful Compound with the knowledge that there is nothing else in the world which will cure your cold or end Grippe misery as promptly and without any other assistance or bad after-effects, as a 25-cent package of Pape's Cold Compound, which any druggist can supply—it contains no quinine—be sure you get what you ask for—accept no substitute—belongs in every home. Tastes nice—acts quickly.

A NATURAL INQUIRY.

WARDEN NOT AT HOME.

Warden (entering cell):—"Your wife is here, asking to see you, seventy-seven." Convict (in desperation):—"Pshaw! Tell 'em I'm out!"—Tribune.

WINE CADDIE

"Playing the Sandy Parlor hole at Deal the other day," says a golfer, "I was just settling myself at a long putt for a half, when I was startled by my opponent's caddy suddenly shouting out to him: 'Look out, sir, you are all right!'—and I saw he was alive, sir, but I never said 'notin' about it, as you was just again to putt.'"

The Keenest Edges Ever Made

Poets have sung and historians told of the razor-edged blades of Damascus steel with which men used to carve each other.

Those were wonderful products of the steel-worker's art—for the time and generation. But modern Science knows where those men guessed, and its keenest products.

GILLETTE Safety Razor Blades

carry edges uniformly sharper and harder than the best the old steel-workers turned out. Every piece of steel from which Gillette blades are made has to come up to a carefully-worked-out chemical analysis, so searching that any defect is quickly detected.

Then each paper-thin blade is hardened through and through by electricity, at a temperature regulated to a fraction of a degree, giving an even, perfectly hardened metal that hand-forging and rule-of-thumb methods could never equal.

At your Druggist's, Jeweler's or Hardware Dealer's, buy a Gillette—you'll enjoy its lasting keenness. Standard Sets \$5.00—Pocket Editions \$5.00 to \$6.00—Combination Sets \$6.50 up.

The Gillette Safety Razor Co. of Canada, Limited

Office and Factory: The New Gillette Bldg., Montreal.

DRUNKENNESS CAN BE CURED

Old Fallacy That Drunkenness Cannot Be Cured Exploded

Many men drink who desire to stop the habit. Whiskey, however, has undermined the constitution and created a craving that is not to be denied, and the man must have whiskey or something that will remove the craving and build up the system and restore the nerves.

Samaria Prescription stops the craving, steadies the nerves, builds up the general health and makes drink actually distasteful and nauseous. It is tasteless, and clothes, and can be given with or without the patient's knowledge, in tea, coffee or food. It is used regularly by Physicians and hospitals, and has cured thousands in Canada, and restored happiness to hundreds of homes.

Read what Mrs. G. of Hull says of it and what it did for her:

"It is four months today since I started to use your remedy. I found the drink habit through being run over by an automobile. The animal was highly prized and was the life of the party. I was so fond of it that the youngster feels his loss most keenly. The machine ran over the dog in Main street, near Portland."

LOCAL NEWS

VITAL STATISTICS.
Thirteen births, six boys and seven girls, were recorded in the city during the last week. The registrar's book also shows nine marriages.

HAS SOOTHY COAL.
The Donaldson liner Almoraz, Captain Rankine, arrived in port this morning at nine o'clock and docked at the Festingill wharf. She was about twenty days making the trip across. Included in her cargo is about 2,000 tons of coal.

TEN DEATHS.
Ten burial permits were issued by the board of health during the last week. The causes of death were as follows: Phthisis, two; paralysis, malarial, heart failure, mucus-enteritis, cerebral hemorrhage, congestion of lungs, and tuberculous osteomyelitis of femur, one each.

LOST VALUABLE DOG.
Little Argus B. Walsh of Main street is mourning the loss of a valuable collie dog, which met sudden death yesterday through being run over by an automobile. The animal was highly prized and was the life of the party. I was so fond of it that the youngster feels his loss most keenly. The machine ran over the dog in Main street, near Portland."

AT HOME HELD.

The members of the Girls' Association last evening conducted a very successful "at home" in their rooms in Union street, and will now be ready to receive. An address was given by Miss Heffer on physical culture, and it was much enjoyed. Miss Pitt, superintendent of the association, also delivered an address.

CITY CORNET JUNIOR BAND.
A juvenile band has been added to the list of musical organizations in the city and will make its first appearance in public in a short time. The organization is a junior branch of the City Cornet Band and is composed of boys of about fifteen years of age. They have been practicing for the last seven months and have attained a considerable amount of proficiency. Their first appearance will be a concert to be given by the parent organization in the Opera House on November 21, in honor of their 38th anniversary, on which occasion the boys' band will contribute a couple of selections to the programme.

PROVINCIAL PERSONALS

Fredericton Gleaner.—Mrs. Harry A. Gibson and children of Maryville left by C. P. R. last evening for Vancouver, B. C., to join Mr. Gibson who left for the west last spring. Joseph E. Smith, of St. Marys, will leave next week to visit his son, Frank Smith, who has been engaged in the construction business at Fort Smith, Arkansas, for several years past.

Moncton Transcript.—Luke Stack left this afternoon for Calgary, where he will locate. Fred O. Thomson, of Moncton, who is taking his last year at Harvard University Dental School, was recently elected president of the Harriet N. Lowell Research Society, and also vice-president of the graduating class.

Sackville Post.—Mrs. E. J. J. Winchell of Mount Whalley intends leaving next week for San Antonio, Texas, where she expects to spend the winter with her daughter.

Amherst to the First church, Lowell Mass., of which he has been pastor four years.

The engagement of Paulina, youngest daughter of Hon. W. W. Sullivan, chief justice of Prince Edward Island, to Edward Ernest McManus, of Memramcook, N. B., is announced. The marriage will take place in Charlottetown on November 27.

A Calais letter says:—Miss Ina Calhoun, local manager for the Postal Telegraph Company, is enjoying a visit at her home in St. Martins, N. B. Mrs. Arthur D. Gannon of St. Stephen is visiting relatives in Philadelphia and Baltimore.
