would, we should think, scarcely warrant the distress, confusion, and disorder that would accrue to the Country, from the Supply Bill being thrown out by the Legislative Assembly.

The weather has been particularly unfavourable for getting in the Potatoe crop. Some thousands of barrels must have been destroyed in this Bay by the frost; and many of them, being stored in a wet state will heat, if they are not properly attended to. The fishery throughout the Country this season has been very unproductive; not being on an average, more than half the catch of former years, and the long continuance of wet weather has injured a good deal of the voyage, that was not shipped off early in the season. In consequence of the unproductiveness this year, of the seal fishery as well as the cod fishery; the losses experienced by the sudden fall in the oil market, the bad sales effected in many of the fish markets and the discouraging prospects afforded at present by the markets in Spain, Portugal and Italy; the quantity of provision imported into this Country, this fall, is likely to fall short of the importations of many former years; and, it is therefore reasonable to expect that many people in this country, during the coming winter, will be placed in circumstances of want and privation.

It is certainly to be deplored, from whatever circumstances it has arisen, that the present session of the Colonial Legislature should have been continued until so late a period in the season, and that the money to be granted for the making of Roads &c. had not been made available before the present period. The Money for the Poor, will, in all probability, be loudly called for during the coming winter, and those who may be the means of keeping it shut up in the Colonial chest, will incur a responsibility, that is not very pleasing to contemplate.

We should deprecate the introduction of Poor Laws in this Country; indeed we are not advocates for eleemosynary relief in any shape, to persons who are able to labour; and would rather see the funds of the country applied in such a way as would encourage industry, and give to the labouring classes the means of earning their own support, and keep them from the humiliating and demoralizing effect that would be produced by their being obliged to subsist on public charity.
