

THE PRESENTATION OF THE DIAMOND NECKLACE.—The Lord Mayor and Corporation of the city of London arrived at the Castle on March 9th, to present the diamond necklace and earrings, of the value of £10,000, to the Princess Alexandra of Denmark. The Corporation assembled in the Waterloo Gallery, from whence they were conducted to the presence of the Princess Alexandra in the Throne or Garter Room. The Princess was accompanied by the Prince of Wales, who stood by her side, and also by her Royal Highness's parents, the Prince and Princess Christian of Denmark. They were attended by the Court. The Lord Mayor, addressing her Royal Highness, said:—

May it please your Royal Highness—As the Lord Mayor of the city of London acting in the name and on the behalf of the Corporation of that ancient city, I have the distinguished privilege of tendering, for the acceptance of your Royal Highness, whom we justly welcome as the affianced bride of his Royal Highness the Prince of Wales, this token of their esteem and admiration. The Corporation of London rejoice in the opportunity which is thus afforded of expressing the deep interest felt by the citizens of London, in common with all classes of the subjects of our beloved Sovereign, on the arrival of your Royal Highness in this country, and their earnest wishes for your future welfare and happiness.

NEW YORK, April 6.—The *Times*'s Washington dispatch says our relations with Great Britain are considered by those conversant with them as extremely delicate.—The correspondence between Earl Russell and Minister Adams with relation to the fitting out and sailing of the pirate *Alabama*, contained in the English Blue Book, but not yet published in this country, and the correspondence still going on touching the construction and equipment in British waters of other piratical craft, have been conducted on the part of John Bull in a tone which is unkind and if not menacing and provocative of war. Russell plants himself on the strict letter of the statute applicable to the case, and refers our Government to that statute, and in effect refuses to take steps to remedy the grievance complained of. The matter has recently been seriously discussed in the Cabinet. It is thought in some quarters that with the capture of Charleston apprehensions on this score may be dismissed. The Ministers here of the principal foreign powers are believed to be of the opinion that its capture is impossible.

M. GODARD, the Celebrated French Aeronaut, has recently constructed an immense balloon of 4300 metres. The car is provided with an apparatus which enables the aeronaut to ascend or go higher up at pleasure. This apparatus consists of a kind of stove formed by three cylinders, separated from each other by insulating substances, whereby all danger of fire is averted. The flame is completely under the control of the aerial traveller, and is prevented from rising too high by a cap of wire gauze. M. Godard asserts that he can inflate his balloon in 30 minutes, and load it with from 600 to 800 kilogrammes over and above the weight of his person and his accessories; and, moreover, that his balloon may be pierced with a bombshell without endangering the aeronaut, who can himself cast projectiles of any kind with impunity. Should this new invention succeed, this balloon may be of considerable service in time of war.

HORSE-FLIES.—Indigo weed stuck plentifully about the harness tends to keep flies from horses. Some make a decoction of indigo weed, and others of pennyroyal, and bathe horses with it to defend them from insects.
