Moncton, Nov. 2—(Special)—H. B. Ames, M. P., who passed through Moncton last night on his way home from New Glasgow, speaking of Dr. Pugsley's references to the Conservative campaign fund said the Conservatives would be prepared to make a full statement in this connection if the Liberals would do the same. He rather thought, however, that the Liberals wouldn't desire any such publicity as that. He anticipates a rather lively and interesting session of parliament.

An eight hour day is what the I. C. R. machinists are shortly to ask the railway department to grant, so it is stated by parties in close touch with the Machinists' Union.

Recently the machinists on the C. P. R. asked and were granted a 9 hour day and a rate of pay that made no disturbance in wages. This concession granted by the company road had resulted in creating an interest in the shorter hours movement among the I. C. R. employes. The question of shorter hours of work has been discussed by the local Machinists' Union and it is pretty well understood that at the next revision of the machinists' schedule the eight hour day will be the leading concession asked for.

Some years ago there was an agitation among the I. C. R. employes here for shorter hours, but there was no union at that time such as the Machinists' Union to grapple with the question and carry it to a successful conclusion. The schedule adopted by the Machinists' Union and the department last spring is subject to revision in April and that is the time it is proposed to bring the shorter hours movement to the front. It is argued by the I. C. R. employes, and not without some force that the government road should not be behind in a matter of this kind, but rather it should be to the front and instead of following the C. P. R's example an eight hour day should be granted to employes all over the system.
