ENDERS CALLED FOR PULP LIMIT U.S. MAKES PROGRESS

Albany and Buffalo Concerns Succeed in Obtaining Commercial Black in Substantial Quantities

ALSO MAKE PRIMARY COLORS

Little Successs With Shades of Tints-Company Turning Out Aniline Oil, Basis of Colors-B.g Profits to Powder Makers.

Substantial headway has been made by the chemisenter an industry that to-day employs over 1,000 and turns out 200 tons of pulp and paper a day and distributes between \$300,000 and \$500,000 among the setters in purchases of pulp wood, has led the country along a similar course with several purchase.

The chief accomplishment appears to have been made by the Albany Chemical Co. and the Schoell-kopf, Hartford and Hanna Co. of Buffalo the latter controlled by the National Aniline and Chemical Co which have succeeded in obtaining commercial black in large quantities, and most of the primary colors.

Little, if any, progress, however, has been made in the development of the finer shedge made in the development of the finer shades and tints.

The Government does not propose to allow any ing of provincial asset in the great northern pulp There is a big demand for commercial black and med limits. The company that gets a lease must the supply in the last few months has been inadequate in the company that gets a lease must contact the wood cut into paper as well. No timber will be cit until the company has spent \$100,000 upon be cit until the company has spent \$100,0 that \$100,000 must be spent the first year, \$250,000 in shoes this season.

sand Mines will retain control over all lands, which template getting colors freely for a year or so.

The difficulty in building up an aniline dye industry Others, June 16.—Hon. Martin Burrell, Minister of Agriculture, has decided on the establishment of two fled interactives, one in New Brunswick and one in P. El. for the special investigation of powdery scab, which recently affected the potatoes in the Maritime of their surplus profits, which, incidentally, are steadily rising because of the higher prices of chemicals and in this country appears to be largely one of time, cou-option at that figure. actus on account of the war demand, into experimental work, and they say that in this manner the industry will be uilt up on a solid foundation, without recourse to governmental aid or bounties of any sort.

SCOTCHMEN MAY GO INTO MIXED FARMING IN WEST

Get Nearer Products and Co-operative Society Was Fermed.

Within the last few days Winnipeg was visited by deputation of Scotchmen that represents very financial and commercial interests. They were W. R. Allan, director: W. F. Stewart, manager, of flour mills, and J. Paisley, chief miller. of the Scottish Co-operative Wholesale Society. Mr. Stewart has been n Winnipeg before, but his two companions were

making their initial trip to the Canadian West Their first business was to consult with their Winsipeg manager, Geo. Fisher, on the grain busine the society. They had, however, other very important matters to look into.

The high cost of living in Great Britain has stimulated the desire of the members of the co-operative society to get nearer the producers, and the deputation The United States Steel Corporation raised its had a remit from their board to inquire into the value and suitability of a large tract of land for wheat growing purposes, or for general mixed farming. putation did not announce this business with any blaze of trumpets, but went quietly to work to secure

all available data and to make personal investigations. In Manitoba they have several very desirable proositions being investigated further for them with a riew to their recommending this step to their board. Their interest in the west did not end here, however, The society purchases unlimited supplies of all kinds of produce, such as butter, cheese, eggs, cattle and all kinds of dressed meats, and the deputation made a lose and searching inquiry about Manitoba's possibilities in this direction. They held long consultations with many of the prominent railway officials and

managers of other lines of business. When leaving for the further west they expressed emselves as much indebted to Prof. S. A. Bedford, Deputy Minister of Agriculture for the Province, and to J. D. McGregor, of Brandon, as well as many oth
