"Bissell" Disk Harrows

The Bissell Disk Harrows have great capacity for hard work, the disk entering the ground naturally and leaving behind it a finely pulverized soil. This is the secret of good tillage.

The frame on the Bissell Harrow is directly over the gangs, the draught being well back where the work is being done. The horses do not have to carry the weight of the pole, levers, braces or frame. This feature is important, and herein lies one great advantage of Bissell Disk Harrows.

For over a quarter of a century the manufacturers of Bissell Disk Harrows have made a special study of this particular implement and spent years of time and effort in perfecting the present Bissell Disk Harrow. The result is that to-day it is acknowledged to be far in advance of any other similar implement for cultivation.

THE ESSENTIAL FEATURES

The Bissell Disk Harrows combine the important features of great capacity for hard work, thoroughness of cultivation, lightness of draught, ease on the horses, and strong, substantial, durable construction. Built also in sizes suitable for use with Tractors.
